INTRODUCTION

NET PROCEEDS OF MINERALS TAX

The net proceeds of minerals tax is determined annually by the Department of Taxation. The tax is based on the actual production of minerals from all operating mines, oil and gas wells, and geothermal operations in Nevada for the prior calendar year.

Mine operators are required to file a statement showing the gross yield and claimed net proceeds from each geographically separate operation where a mineral is extracted, on or before February 16 of each year, for production in the prior calendar year. Statements may be amended up to 30 days after filing on February 16 (NRS 362.110). Pursuant to NRS 362.110, royalty recipients no longer file a report annually, until the statute sunsets on June 30, 2013. At that time, royalty recipients resume filing a report annually by February 16 showing the amount of royalties received during the prior calendar year.

The Department determines the net proceeds of minerals tax due based on the information filed by the taxpayer, as well as from all obtainable data, evidence and reports available. The net proceeds are determined by subtracting from the gross yield certain deductions for costs incurred during the calendar year immediately preceding the reporting year. Costs available for deduction may be ascertained from Nevada Revised Statutes (NRS) 362.120 and Nevada Administrative Code (NAC) 362.030 through 362.070. No costs may be deducted from the royalty portion reported by operators; or by royalty recipients after June 30, 2013. The Department prepares and mails certificates for net proceeds on or before April 20th or April 30 if an amended report has been filed. Taxes must be paid on or before May 10th of the year in which the certificate is received (NRS 362.130).

The tax rate applied to the net proceeds is based on a sliding scale between 2% and 5%, depending on the ratio of net proceeds to gross proceeds. (NRS 362.140). Of the total tax rate, a portion of the overall tax liability is based on the local rate where the mine is located, and the balance up to the constitutional limit of five percent, is the state portion of the tax. For example, if a company generates \$1,000,000 in net proceeds, out of a total of \$2,000,000 gross yield, then, according to the statutes, the ratio of net proceeds to gross proceeds is 50%, and the rate of tax would be 5%. If the local tax rate where the mine is located is .0364, then the balance after subtraction from 5% would be the state portion of the tax, or .0136.

Special legislation was passed in December, 2008 (SB 2) to accelerate the payment of net proceeds, and is scheduled to sunset June 30, 2013. In addition to the required reporting for the prior year's production, operators must also file a statement showing the estimated gross yield and estimated net proceeds, and an estimate of all royalties that will be paid for the current year; and pay the tax on the estimated production on March 1st each year. The reports may be amended on a quarterly basis through the following January 31st. (NRS 362.115). The amounts paid in advance are deducted from the billing mailed by the Department in April of the year following production. Penalties may be levied for failure to file the reports or pay the taxes timely as required by NRS 362 (362.115, 362.160, 362.230, 362.240, 360.300, 360.417, also see NAC 362.089).
