“Revised as of September 12, 2019”

Public Health and Safety Advisory August 23, 2019

The Nevada Department of Taxation is issuing a revised Public Health and Safety Advisory of the following products:

DOSI popcorn/Joints/3.5g	Harvest date 5/28/2019	Batch # DOSI 052819	Lot# L1
DOSI popcorn	Harvest date 6/17/2019	Batch # DOSI 061719	Lot# L1
Funky Malawi 1g	Harvest date 7/10/2019	Batch # FM-07102019-01	Lot# FM-07102019
Fruity Chronic Juice 1g/3.5g	Harvest date 7/10/2019	Batch #FGJ-07102019-01	Lot# FGJ-07102019

The affected marijuana failed total yeast and mold testing conducted by the Nevada Department of Agriculture. The results indicated total yeast and mold on the affected marijuana existed at levels of 95,000; 390,000; 110,000; and 48,000 cfu/g. The amount permitted under NAC 453D.780 is <10,000 cfu/g - total yeast and mold levels above this amount are deemed to constitute a threat to public health and safety.

Consumption of the affected marijuana should particularly be avoided by individuals with suppressed immune systems or who are susceptible to the presence of yeast or mold.

It is believed the affected marijuana was sold in the form of flower and pre-rolls between 7/11/19 and 8/19/19 by the following Retail Stores/Medical Dispensaries:

1. Acres Medical, LLC (license # 11058209030610809158)
2. D. H. Flamingo, Inc (license # 01359449685112111637)
3. Naturex II, LLC (license # 50748233769645953480)

The affected marijuana was cultivated by D. H. Aldebaran Inc (license # 04584977759671021505) and Las Vegas Natural Caregivers, LLC (license # 82798431024231095044) and harvested between 5/28/19 and 7/10/19.

All marijuana and marijuana products properly sold by a licensed store or dispensary should have a product label on the packaging. The batch and lot number can be found on the label, typically near the top, directly below the facility information.

There have been no reports of illness. The possible health impact of consuming marijuana products with excessive amounts of yeast and mold can be found in the link at the bottom of this notice. Short and long-term health impacts may exist depending on the specific product, duration, frequency, level of exposure, and route of exposure. Consumers with concerns about their personal health should contact their physician with related questions.

Consumers and patients are advised to destroy the affected marijuana or return it to the marijuana establishment from which it was purchased.

At this time, there is no indication that the Cultivators, Retail Marijuana Stores or Medical Marijuana Dispensaries were aware the marijuana failed a test for total yeast and mold. The initial testing laboratory provided passing results to the affected marijuana, but the Department subsequently requested follow up testing.
