Att: Tina

Thank you for providing your email address in order to express mine and many other marijuana non-user's feelings and experiences that I hear from regarding marijuana exposure. Also, I didn't find a simple process on the internet to be able to find contact numbers to forward testimonies to the appropriate individuals. Hopefully, in the future you will have easier internet methods.

Not only does research suggest many negative side effects and risks from using marijuana, but NON-users of pot are being forgotten when it comes to marijuana regulations! No one seems to be protecting the rights of non-users and children! Individuals living in condos, apartments, duplexes (attached housing) are NOT being considered! Marijuana users are able to smoke anytime in their "private" homes, but their homes are not private!

Their second hand smoke penetrates adjacent and upper residences exposing others to a regularity of repugnant smells making for much nausea, allergies, total frustration, etc etc.! Residence are afraid to confront pot smokers for fear of retaliation; often many additional individuals are coming and going from these homes. One wonders what"s going on in their units.

What is being done for children of marijuana users? These children are very vulnerable to being exposed to marijuana food products and second hand smoke as well!. Hopefully, you will provide some type of regulations for these situations such as WHO TO CONTACT other than contacting marijuana users themselves.

Please, it would be very helpful if for once if the government assisted the "majority" rather than the "minority"! I will appreciate this testimony going to the appropriate individuals.

Thank you for your time and consideration.
