LOBBYING EXPENSE ESTIMATE**

For use in Legislative Session years.

**SCHEDULE OF EXISTING CONTRACTS AND  
SCHEDULE OF PRIVATIZATION CONTRACTS**

NRS 354.5965

Report existing contracts separately from privatization contracts. Use Schedule 31 for Existing Contracts and Schedule 32 for Privatization Contracts. A privatization contract is defined as a contract executed by or on behalf of a local government which authorizes a private entity to provide public services which are:

- (a) Substantially similar to the services provided by the public employees of the local government; **and**
- (b) In lieu of the services otherwise authorized or required to be provided by the local government.

Include only contracts with persons or temporary employment services on Schedule 31 or Schedule 32. Do not include contracts which involve only the purchase or procurement of goods and supplies. On Schedule 32, list only those contracts which meet both conditions listed in the definition above.

For example, if a government is authorized to construct a building but it does not normally employ public employees to construct buildings, the construction contract would not be listed as a privatization contract. Another example would be if a government is required to provide police services and the service is substantially similar to the services already provided by public employees, the contract should be listed as a privatization contract.

**Schedule 31  
Existing Contracts**

This schedule summarizes existing contracts with persons or temporary employment services along with the proposed expenditures for such contracts for

the next two fiscal years and the reasons for the use of such persons or services.

Step 1: Enter the name of the entity and the contact information of the person procuring and/or administering contracts.

Step 2: Enter in the space provided the vendor name and the following information:

- 1) Effective date of contract;

- 5) A brief explanation of the reasons or needs for the contract;

Step 3: Summarize the total number of existing contracts on the top right of the schedule and the total estimated expenditures for such contracts for the next two fiscal years on line 20 or at the end of the listing. A summary of FTEs is not required for existing contracts.

Use additional sheets if necessary to list contracts or to provide additional explanation of the contract. If additional explanation is needed for a contract, be sure to reference the line number and vendor listed on the first page of the Schedule.

**Schedule 32  
Privatization Contracts**

This schedule itemizes those contracts considered to be "privatization" contracts, in which a private entity provides services substantially similar to services provided by public employees and are in lieu of services otherwise required to be provided by the local government. See complete definition in NRS 354.5965(3).

**Internal Service Fund** NRS 354.543

A fund used to account for the financing of goods or services furnished by a designated department or agency to governmental units within its own organization or to other departments or agencies on the basis of reimbursements for costs.

**Expendable Trust Funds**

Funds where principal and income may be expended in the course of their designated operations. Expendable trust funds are most often used to account for income amounts transferred to them from non-expendable trust funds. Expendable trust funds may also be used to account for endowments whose principal may be expended in the course of their designated operations. However, under Statement 1, the use of expendable trust funds should generally be limited to instances where legally mandated or where a formal legal trustee relationship exists. Expendable trust funds are accounted for essentially in the same manner as governmental type funds.

**Non-Expendable Trust Fund**

A trust fund, the principal of which may not be expended. Non-expendable trust funds are accounted for in essentially the same manner as proprietary funds. These funds need not be budgeted for unless they receive Property Tax or Supplemental City/County Relief Taxes or there are Inter-fund transfers to or from.

**Fund Balance** NRS 354.533

The excess of assets over liabilities and reserves in a governmental fund.

**Function** NRS 354.529

A group of related activities aimed at accomplishing a major service or regulatory program for which a governmental unit is responsible. For example, public safety is a function.

**Quasi-External Transactions**

Transactions that would be treated as revenues, expenditures, or expenses if they involved organizations external to the governmental unit. Examples include payments in lieu of taxes from an enterprise fund to the general fund; internal service fund billings to departments; routine employer contributions from the general fund to a pension trust fund; and routine service charges for inspection, engineering, utilities, or similar services provided by a department financed from one fund to a department financed from another fund.

**Reserve** NRS 354.560

In accounting and reporting of government funds, a portion of the fund balance which is not available for appropriation for expenditures or is segregated by law or contract for a specific future use.

**Residual Equity Transfers**

These are nonrecurring or non-routine transfers of equity between funds. Examples include contribution of capital by the general fund to an enterprise fund or internal service fund, then subsequent return of all or part of such contribution to the general fund, and transfers of residual balances of discontinued funds to the general fund or to a debt service fund. Residual equity transfers are all reported at the bottom of the resource section of the funds affected.

**Operating Transfers**

All inter-fund transactions except loans or advances, **and** quasi-external transactions are accounted for as transfers. **Schedules BB** must be filed for all funds involved in transfers; this includes transfers to or from trust funds: Examples include legally authorized transfers from a fund receiving revenue to the fund through which the resources are to be expended. Operating transfers are reported in the "other sources and uses" sections of the various schedules immediately preceding the total columns. This is to emphasize they are neither revenues nor expenditures of the entity as a whole.
