## 2025-26 PERSONAL PROPERTY MANUAL – VALUATION GUIDELINES

---

The schedules presented herein are interpretive guidelines for use by county assessors to establish taxable value, pursuant to the requirements of NRS 361.227(4) and NAC 361.1365 and 361.1375.

### CLASSIFICATION OF PROPERTY

---

Personal property is defined in NRS 361.030 and includes (j) “all property of whatever kind or nature, except vehicles as defined in NRS 371.020, not included in the term “real estate.” Real estate is defined in NRS 361.035, and includes land, houses, buildings, fences, ditches, structures,<sup>1</sup> erections, railroads, other improvements, and property rights. Real property is further defined in NAC 361.11715 as land, fixtures, improvements; on-site enhancements; and any rights, interests, benefits and privileges belonging or attached to the land.

[NRS 361.333](#) requires that each major class of property be examined to determine whether there is equality of assessment. Uniformity and equality of assessment thus depend on proper classification. Although [NRS 361.035](#) defines real estate and [NRS 361.030](#) defines personal property, in practice it is sometimes difficult to tell whether an item is personal or real property. As the Attorney General stated in Opinion #41 (1963), “the classification depends on the facts of each particular case.” The assessor is encouraged to consult the Division of Excise and Local Government Services and/or the District Attorney in difficult cases.

All references to statutes and regulations may be found in [Appendix A](#) of this Manual.

### EXEMPT PROPERTY

---

[NRS 361.050](#) through [NRS 361.187](#) provide exemptions for assorted types of eligible property, including household goods; business inventories; property in transit; property owned by government entities, charitable organizations or veterans; and fine art for display.

Additionally, [NRS 361.228\(1\)](#) provides that

All intangible personal property is exempt from taxation, including, without limitation:

- (a) Shares of stock, bonds, mortgages, notes, bank deposits, book accounts such as an acquisition adjustment and credits, and securities and chooses in action of like character; and
- (b) Goodwill, customer lists, contracts and contract rights, patents, trademarks, trade names, custom computer programs, copyrights, trade secrets, franchises and licenses.

A complete discussion of exemptions and a cross-reference table is included in [Appendix D](#) of this manual.

---

<sup>1</sup> Structures include self-supporting structures other than buildings which carry gravity loads and resist the effects of earthquakes. They are generally not designed for continuous human occupancy and may be open to the environment, part of landscape design elements, or part of infrastructure systems (transport, water, energy). Examples of non-building structures include silos, chimneys, stacks, cooling towers, bins and hoppers, amusement structures, and monuments. See *American Society of Civil Engineers, “Minimum Design Loads for Buildings and Other Structures;” Revision of ASCE Standard 7-98, SEI/ASCE 7-02, 2<sup>nd</sup> Edition, Section 9.14, Nonbuilding Structures, p. 186.* See also *Bachman, Robert and Susan Dowty, “Nonstructural Component or Nonbuilding Structure,” originally published in Building Safety Journal (April-May, 2008).*

## PROCEDURES FOR DETERMINING TAXABLE VALUE

---

To calculate the taxable value of personal property, [NAC 361.1371](#) and [NAC 361.1375](#) require the assessor to determine four input values:

- Acquisition cost
- Acquisition year
- Expected life, and
- Cost conversion factor

The personal property declaration submitted by the taxpayer pursuant to [NRS 361.265](#) should list the acquisition cost for each item and the year acquired. The declaration should also contain sufficient information to identify each item's industry classification (NAICS code), property type, and corresponding expected life.

### *Acquisition Cost*

For personal property mobile or manufactured homes, acquisition cost means replacement cost when new, which equals the retail selling price to the original owner. For other types of personal property including billboards, acquisition cost means the actual cost of property to its present owner. For all personal property, acquisition cost includes any expense required to place the asset into service except sales tax—including all charges for transportation, installation, accessories, and profit and overhead, as well as additions to or renovations of the property other than routine maintenance or repairs. Observe, however, that the cost of manufactured homes does not include appurtenant improvements like outbuildings, decks, or paving. The assessor should value these separately as real property and depreciate as appropriate.

Should a taxpayer fail to file a valid personal property declaration or sufficient data is not otherwise available for the assessor to establish acquisition cost, [NRS 361.265](#) authorizes the assessor to make an estimate of the value of the property. [NAC 361.139](#) further requires the assessor to estimate its acquisition cost using any nationally recognized valuation technique. Because [NRS 361.265\(5\)](#) defines failure to file a declaration as a misdemeanor, assessors should advise taxpayers to file complete, accurate, and timely personal property declarations. In addition, if the reported acquisition cost appears inconsistent with market data, the assessor may request documentation for the cost reported and may pursue penalties for perjury if necessary.

### *Acquisition Year*

For mobile and manufactured homes, the acquisition year equals the year of the sale to the original owner, which often corresponds to the manufacturer's model year. For all other personal property, the acquisition year equals the year the current owner purchased or leased the property. Observe that the acquisition year remains constant at the year first sold for manufactured homes but resets to the year acquired each time billboards or equipment change owners.

### *Expected life*

The Life Expectancy Guidelines section assigns typical asset lives to each major industrial classification grouped by NAICS code. For example, all industries classified as *Agriculture and Forestry (NAICS .11)* have 15 year lives, while *Mining (NAICS .21)* assigns a 20-year life to *Oil and Gas Exploration (NAICS .2111)* and a 15-year life to *Mining (NAICS .2121 & .2122)*.

Certain items within industries appear separately as Itemized Equipment with specific lives that may differ from the industry norm. For example, *Agriculture and Forestry* industries with a typical 15-year life expectancy also use specialized equipment whose asset lives equal 7, 10 or 20 years. To improve accuracy, assessors should employ the itemized equipment lives whenever they can assign a specific life expectancy to a particular item.

Having identified the industry classification for the subject account the assessor then assigns its appropriate NAICS code and corresponding expected lives to its assets. See *discussion on NAICS below for current requirements*.

Readers may also use the alphabetical listing of personal property by general type found in the [Index](#) of this Manual to locate the appropriate expected life for individual items. Because some industries use similar types of business equipment, like desks or computers, readers should select the NAICS classification that best describes the subject account.

Besides these NAICS Life Expectancy Guidelines, the Personal Property Manual also contains a Special Properties section with descriptions and asset life tables for:

- Short-life property subject to rapid obsolescence;
- Items similar to real property classified as personal, like mobile and manufactured homes or billboards;
- Generic business equipment found across many industries, like furniture and trade fixtures or computers; and
- Specialized assets like high-tech medical diagnostic equipment whose economic lives differ substantially from industry norms.

### *Cost Conversion Factors*

Based on the acquisition cost, acquisition year and expected life for an item, the assessor should select the appropriate Cost Conversion Factor from the tables published in the Personal Property Manual.

Cost Conversion Factors contain three components: Cost Index, Age and Percent Good. To satisfy the requirement of [NAC 361.1375\(2\)](#) the department develops Paasche indexes for manufactured homes, billboards, and business equipment derived from pertinent Marshall Swift comparative cost multiplier tables, the West Urban, All Items CPI index, and the PPI Index for Capital Equipment, Stage of Processing. These indexes inflate replacement cost new expressed in acquisition year nominal dollars into replacement cost new expressed in current year nominal dollars.

Cost indexes do not apply to mobile and manufactured homes first sold prior to July 1, 1982, whose taxable value always equals 20% of their original selling price. Cost indexes for equipment and billboards do not accrue beyond their expected lives; such items have a constant residual cost conversion factor equal to their residual percent good multiplied by the residual year cost index.

To comply with [NAC 361.130\(2\)\(b\)](#), however, cost indexes do apply to mobile and manufactured homes first sold on or after July 1, 1982. Even though mobile homes fully depreciate after sixteen years, applying the cost index to the years between the current year minus 16 and 1982 may actually produce a temporary increase in taxable value.

[NAC 361.1375\(4\)&\(5\)](#) specify declining balance depreciation with a 5% residual (salvage value) for all property types except manufactured homes and billboards, which use straight line depreciation. Unless the Department has conducted a market study or has otherwise obtained information which indicates a different residual amount, the Department currently relies on a double declining balance method for all equipment and a 5% residual; 5% per year depreciation with a 20% residual for mobile homes (16 year life), and 1.5% per year depreciation with a 25% residual for billboards (50 year life).

Percent good equals (1 - accrued depreciation) for the given asset age, where age equals the current year (first year of the biennium) minus the acquisition year. For example, for the 2025-26 fiscal year, an asset acquired in 2018 has an age of seven years, a manufactured home first sold in 1992 has an age of thirty-three years. Although one could calculate depreciation directly, the tables reduce this process to a simple lookup.

To calculate taxable value using the Personal Property Manual, the assessor completes three steps:

- Select the appropriate expected life table,
- Look up the cost conversion factor for the given acquisition year and,
- Multiply the acquisition cost by the indicated cost conversion factor.

As usual, assessed value equals 35% of taxable value.

## A NOTE ON NAICS

---

The North American Industry Classification System ([NAICS](#)) replaced the Standard Industrial Classification (SIC) in 1997. NAICS is based on a production-oriented concept, meaning that it groups establishments into industries according to similarity in the processes used to produce goods or services.

NAICS in the United States was designed for [statistical purposes](#). However, NAICS is frequently used for various administrative, regulatory, contracting, taxation, and other non-statistical purposes.

For additional information and complete tables, readers may consult the US Census Bureau website <http://www.census.gov/eos/www/naics/>

**The Department highly recommends assessors use the NAICS code on each personal property account.** Use of the NAICS code will assist in the proper valuation of property pursuant to this Personal Property Manual because the NAICS code identifies the type of industry engaged in by the taxpayer.

In addition, the NAICS code is now a required component on the Statistical Analysis of the Roll Reports required by the Department in NRS 361.390 (3) in order to keep track of tax expenditures per NRS 360.137. For those concerned about the availability of the NAICS code to business taxpayers, use of the NAICS code will be widespread because taxpayers subject to the new Commerce Tax are required to provide the NAICS code. In addition, the NAICS code is required on applications for abatement to the Governor's Office on Economic Development and the Governor's Office on Renewable Energy. **The Department recommends assessors collect the NAICS code on Personal Property Declarations used by business taxpayers.**

## 2025-26 PERSONAL PROPERTY MANUAL – VALUATION GUIDELINES

---

### SHORT-LIFE PROPERTY

---

**Expected Life ..... Three (3) years**

Short-Life Property consists of items prone to rapid obsolescence or susceptible to breakage, loss or abnormal wear and tear.

Examples include:

Linens	Uniforms
Glassware	Pots, Pans, Utensils
Barware	Motion Picture Prints
Silverware	Rental Video Tapes, DVDs, CDs

#### Jigs, Dies, and Molds

Patterns, jigs, dies and molds fall into this category when the type of product manufactured, industry class, use of caustic chemicals, or physical deterioration associated with production volume act to shorten their useful lives and thus require their frequent replacement. Examples include injection molds for plastic parts of high-tech devices or dies used in heavy equipment production.

Ideally, assessors should identify the industrial application and determine the actual service lives of equipment used in current production from owner declarations or surveys of average lives from individual manufacturers before classifying such property as Short-life.

#### Digital Cameras

Digital cameras fall into two basic categories: professional and snapshot. In recent years, consumer-grade, digital snapshot and video cameras have become a generic commodity. They offer small, flimsy LCD monitors, low image resolution, and lack advanced features like interchangeable lenses. Only snapshot cameras qualify as Short-life property.

---

### INFORMATION SYSTEMS

---

Life expectancies for computers and peripherals fall into four broad categories:

<b>PCs, Tablets, and associated peripherals</b> .....	<b>Three (3) years</b>
<b>Mini-computers (AS 400, VAX)</b> .....	<b>Three (3) years</b>
<b>Servers</b> .....	<b>Five (5) years</b>
<b>Mainframe Computers (IBM 360)</b> .....	<b>Seven (7) years</b>

An information system consists of computers and peripheral equipment used for processing normal business transactions and the maintenance, retrieval, and analysis of business records.

A computer functions as a programmable, electronically activated device capable of accepting information, applying prescribed processes to the information, and supplying the results of these processes with or without human intervention. It usually contains a central processing unit that provides storage, logic, arithmetic, and control capabilities. Observe that adding machines and electronic calculators do not fall into this category.

To assign appropriate expected lives to computing equipment, assessors need to recognize the differences among mainframes, servers, client computers and personal computers.

Recent advances in computing technology make differentiating mainframes, minicomputers and servers difficult, especially for laymen. When in doubt, consult manufacturer marketing divisions, service literature, or websites to determine how they classify their various product lines.

A mainframe serves as a high-performance computer used for large-scale computing environments that demand greater availability and security than smaller-scale machines can offer. Banks, government agencies, insurance companies, credit card companies, and other organizations that perform massive transaction processing typically use mainframe systems. It is also possible to obtain a server which contains many "blades," each of which is used for a single application.<sup>2</sup> Currently, there are blade servers that have as many as 160 blades.

Mainframes should not be confused with servers, or with a server that uses software to spin off many virtual servers, each with its own computer operating system. Servers usually cost considerably more than personal computers, have more processing power and substantial amounts of computer memory. They are therefore significantly more expensive than most personal computers and they are often kept in service longer than personal computers. Servers are often dedicated to specific tasks like

- Transaction processing (On Line Transaction or OLT servers)
- print queuing and printing (print server)
- running mission critical software, clustering, fail-over and load-balancing (application server)
- audio and video transmission (audio video server)
- exchanging short bursts of written information and opinions in an environment that offers real-time discussions (chat servers)
- sending and receiving faxes without using fax machines (fax server)
- File Transfer Protocol – moving files between computers while providing security and, organization, and transfer control (FTP server)

Historically, mainframes have been associated with centralized rather than distributed computing, although that distinction has blurred as smaller computers become more powerful and mainframes become more multi-purpose. Today, mainframes can serve both distributed users and smaller servers in computing networks. Interestingly, a mainframe actually resides within a server box.

---

<sup>2</sup> A major advantage of a blade server is that it dramatically reduces cabling requirements.

A key distinguishing feature of a mainframe is that it takes computing power away from end users and puts it in a central location. Another way to visualize a mainframe is to think of the computer as a super server, with multiple operating systems.

Here is a link to the [Family Tree And Chronology of some of the older IBM Mainframes](#). This link will take you to the [IBM page for System Z Mainframes](#).

By comparison, minicomputers are stand-alone computers (computer systems with attached terminals and other devices) sold to small and mid-size businesses for general business applications and to large enterprises for department-level operations. In recent years, the minicomputer has evolved into the "mid-range server" and is part of a network. IBM's [AS/400e](#) is a good example.

Peripheral equipment consists of the auxiliary machines which are designed to be placed under the control of a central processing unit. Peripheral equipment may include card readers, card punches, mass storage units, paper tape equipment, keypunches, data-entry devices, teleprinters, terminals, tape drives, disc drives, disc files, disc packs, visual image projector tubes, card sorters, plotters, collators, small inkjet printers, small laser printers, and small desktop all-in-one devices (e.g. printer/fax/scanner combination) that are sold as commodities in retail outlets and which are rapidly replaced as faster machines with new features are added.

Although one could classify computers by processor architecture, number of users supported, total system throughput, etc, ultimately the classification boils down to total system cost and the total time required to amortize the assets. Again, taxpayer records that reveal the actual service lives and disposition values of their own data processing equipment provide the best source of verifiable market data.

**TAXABLE SOFTWARE (NOT ASSOCIATED WITH  
COMPUTER-INTEGRATED MACHINERY)**

---

**Expected Life ..... Three (3) years**

Nevada law treats standard, prewritten software programs as tangible personal property.<sup>3</sup> A standard prewritten program, often called canned or off-the-shelf software, means a generic application not originally developed and produced for a specific user. This includes any programs, procedures, rules, and associated documentation pertaining to the operation of a computer system. Custom software programs consist of original, one-of-a-kind computer applications developed under contract exclusively for the particular requirements of a specific user. Custom computer programs qualify as exempt intangible personal property pursuant to NRS 361.228.

---

<sup>3</sup> **According to the IRS**, "Computer software is not a section 197 intangible even if acquired in connection with the acquisition of a business, if it meets all of the following tests.

- It is readily available for purchase by the general public.
- It is subject to a nonexclusive license.
- It has not been substantially modified.

If the software meets the tests above, it can be depreciated and may qualify for the section 179 expense deduction and the special depreciation allowance (if applicable)." <http://www.irs.gov/publications/p225/ch07.html>

## COMPUTER-INTEGRATED MACHINERY

---

**Expected Life** ..... **Seven (7) years**

Computer integrated machinery, including its integrated programming or software, exhibits the following characteristics:

- The machinery and computer sell as a single unit.
- The machinery cannot operate without the computer and the computer cannot perform functions outside the machinery.
- The components of the computer form an integral, structural part of the equipment itself; it is not economically or functionally feasible to replace the computer without replacing the entire machine.
- For income tax purposes, depreciation accrues to the total cost of the machine and computer as a unit.
- The capabilities of the machine cannot be expanded by substituting a more complex computer for the original.
- Embedded programming or pre-loaded software designed primarily for the function of the machine into which it is integrated runs the computer.

Examples of computer-integrated machinery include computer driven mills; computer integrated manufacturing machinery; computer integrated fabrication machinery; computerized machine lathes; and computerized assembly machinery.

## ROBOTS AND ROBOTIC DEVICES

---

**Expected Life:**

**Industrial and Service Robots** ..... **Ten (10) years**  
**Medical Robots** ..... **Seven (7) years**  
**Robotic Devices** ..... **Five (5) years**

This category includes robots and robotic devices operating in both industrial and non-industrial environments. The assessor should assign expected lives to the robots and robotic devices separately. Any robotic machines or devices that do not meet the characteristics of a robot as set forth by the International Organization for Standardization (ISO) are not considered robot for personal property assessment purposes.

Robots and robotics are usually used interchangeably but robotics has a broader meaning than the term robots. The ISO created a differentiation between robotic devices and robots. **Robotic Devices** are “mechanisms developed with robotic technology but not fulfilling all characteristics of a robot.” For example, *teleoperated remote manipulator, haptic device, end-effector, unpowered exoskeleton, two-axis industrial manipulator*. **Robots** are “programmed actuated mechanism with a degree of autonomy to perform locomotion, manipulation, or positioning.”

Robots are mainly mechanical or hardware but also contain some level of programming (software component). The hardware or physical component includes the body/frame, central processing unit (CPU) or control system for processing and executing instructions, sensors for collecting data from the environment, actuators (motors) for physical movement, end effectors for completion of tasks, and power supply for providing energy to the robot. The software (program) is an integral part for robots to operate for its intended use. The combination of

programming software and control system provides the robot the capability to perform and complete its tasks. The software can be upgraded or modified depending on the business needs.

In general, robots are categorized by their primary use or intended application. Nowadays, the most common robot types include industrial robots used for manufacturing (e.g., automotive, aerospace, electronics, consumer goods, etc) and service robots used for retail and hospitality, healthcare, and logistic businesses. The following provides the definition and distinction between the industrial robot and the service robot in accordance with the ISO standards.

### **Industrial Robot**

An industrial robot is “a multifunctional, reprogrammable, automatically controlled manipulator, programmable in three or more axes that can be fixed in one area or mobile for use in industrial automation applications” (ISO 8373:2012). Thus, industrial robots are fully autonomous machines that do not require human intervention and can be re-programmed to perform several functions such as welding, painting, assembly/disassembly, pick and place for printed circuit boards, packaging and labeling, palletizing, product inspection, material handling, cutting, or grinding, testing, etc. Single-purpose automated machines that cannot be re-programmed to perform other tasks or need a human operator are not considered industrial robot. Autonomous Mobile Robots (AMR) used in industrial environments that have less than three axes (movement) and lack of manipulation capabilities are not considered industrial robots. Robots not intended for industrial applications are also not considered industrial robot.

Six Major Types of Industrial Robots Based on Mechanical Structure:

1. Articulated Robots – most common industrial robot; emulate human arm (have three to six rotary joints) that allows a wide range of movement; capable of lifting heavy objects.
2. Cartesian Robots – have three prismatic joints for the movement of the tool and three rotary joints for its orientation in space (can only move linearly in three directions – forward and backward, up and down, and side to side); rigid in all three axes which makes them accurate.
3. Cylindrical Robots – characterized by rotary joint at the base and at least one prismatic joint connecting its links (can move vertically and horizontally); commonly used in small spaces and ideal for objects that require circular symmetry (e.g., wires, pipes).
4. Spherical (Polar) Robots – an older technology; a combination of two rotational joints and one linear joint creating a spherical-shaped working space; commonly used for painting and welding.
5. SCARA (Selective Compliance Assembly Robot Arm) Robots – characterized by two parallel joints which provide movement in X-Y plane; rotating shafts are positioned vertically at the effector; ideal for assembly application and palletization.
6. Delta Robots – consist of parallel links connected to a common base (spider-like arm); useful for direct control tasks and high maneuvering operations (pick-and-place).

### **Service Robot**

A service robot is a robot “that performs useful tasks for humans or equipment excluding industrial automation applications.” A degree of autonomy (full or partial) is required for service robots. Thus, service robots are either fully autonomous or operated by a built-in control system, with manual override options, and assist people by performing repetitive, dull, dirty, or dangerous tasks. Service robots are for professional use. Examples include logistics and delivery robots, social robots, restaurant/waiter robots, cleaning robots, disinfection robots, kitchen/chef robots, agricultural robots, aerial robots (drones), underwater robots, etc.

## Medical Robot

The "new" ISO robotics vocabulary standard ISO 8373:2021 defines medical robots as a third category next to industrial and service robots. A medical robot is a robot intended to be used as medical electrical equipment or medical electrical systems. It is controlled by a surgeon (not autonomous). An example of medical robot is the Da Vinci Surgical System. Currently, it is the only surgical robot approved by the Food and Drug Administration (FDA) to perform surgical procedures. Da Vinci assists surgeons in performing gynecological surgeries, urological, head and neck, thoracic, colorectal, cardiac and general surgeries. This robot machine consists of three parts: the control center (which carry the surgeon's seat allowing a 3D-magnified, high-definition view and use of hand and foot controls); the patient cart (which holds the surgical instruments and the camera); and the vision cart (which contains a video screen). In line with high-tech electronic medical equipment, the medical robot is assigned a seven-year life.

## COMPUTERIZED EQUIPMENT

---

### Expected Life:

**Free-standing computer system** ..... **Seven (7) years or**  
**Generic personal computer** ..... **Three (3) years**  
**Equipment component**..... **NAICS industry class life**

This category includes machines controlled by computers that sell as a separate unit from the machine and can perform additional functions outside the machine. The assessor should assign expected lives to the two components separately; the computer equipment has the same expected life as similar computer equipment; the machinery has the expected life assigned to its specific industry.

Examples include:

Computerized Machine Lathes,  
Computerized Assembly Machinery,  
Cash Management Systems,  
3-D Printers.

## HIGH-TECH MEDICAL DIAGNOSTIC EQUIPMENT

---

**Expected Life** ..... **Five (5) years**

High-tech medical diagnostic equipment exhibits these characteristics:

- Used in medical or dental facilities;
- Subject to accelerated functional and economic obsolescence caused by rapid technological development.

Examples include:

[Cardiac Ultrasonic Scanners](#)  
[CAT \(Comp Tomography\) Scanners](#)  
[Diagnostic Ultrasounds](#)

- [General Ultrasonic Scanners](#)
- [MRI \(Magnetic\) Scanners](#)
- [Nuclear Medicine Cameras](#)
- [OB/GYN Ultrasonic Scanners](#)
- [PET Scanners](#) (Positron Emission)
- [All Portable Units of Same](#)

Endoscopy Equipment (amnioscopes, angioscopes, arthroscopes, bronchoscopes, colonoscopes, cystoscopes, encephaloscopes, esophagoscopes, gastroscopes, hysteroscopes, laparoscopes, laryngoscopes, mediastinoscopes, nephroscopes, proctoscopes, rhinoscopes, thoracoscopes, endoscopy tower, endoscopy camera, endoscopy light sources, endoscopy video processors, insufflators, and electro-surgical units)

## HIGH-TECH ELECTRONIC MEDICAL EQUIPMENT

---

### Expected Life:

**Cardiac laser units** ..... **Three (3) years**  
**Other items** ..... **Seven (7) years**

High-tech electronic medical equipment exhibits these characteristics:

- Used in medical or dental facilities;
- Subject to accelerated functional and economic obsolescence caused by rapid technological development.

Examples include patient monitors of all kinds:

## MOBILE OR MANUFACTURED HOMES

---

This section applies only to mobile or manufactured homes classified as personal property. Pursuant to NRS 361.561, those units identified as a "travel trailer," "utility trailer" and "van conversion," in Chapter 482 of NRS and any other vehicle required to be registered with the department of motor vehicles and public safety are subject to property tax unless registered and taxed pursuant to Chapter 371 of NRS. Such unregistered units and vehicles must be taxed in the manner provided in NRS 361.562 to 361.5644, inclusive.

The sticker issued pursuant to NRS 361.5643 must be affixed to a mobile or manufactured home in such a way that the sticker is clearly visible from the street. The window decal is not required for licensed mobile units or on units considered real property and may be issued at the option of the county assessor.

NRS 361.325(3) segregates mobile homes into two different categories for assessment purposes based on age. Mobile homes sold on or after July 1, 1982 shall be classified according to those factors which most closely determine their useful lives. In establishing the value of other mobile homes, the commission shall begin with the retail selling price and depreciate it by 5 percent per year, but not below 20 percent of its original amount. The assessment ratio in all cases is 35 percent of the computed taxable values. See NAC 361.130 for additional information on the calculation of value for mobile homes.

Depreciation schedules and cost conversion factors apply to the 2025-26 Secured and Unsecured Tax Rolls. The 2025-26 Cost Conversion Index for Mobile or Manufactured Homes appears on pages 8-9 of this manual.

---

<sup>4</sup> Point-of-Sale systems include all peripherals and handheld devices used to take electronic payments or to collect related data with the exception of smartphones, tablets and POS tablets. Smartphones, tablets and POS tablets should be given a three-year life.

<sup>5</sup> See Appendix E to determine whether signs are real or personal property. Personal property signs include vinyl and fabric banners and sign-waving mannequins.

## BILLBOARDS

---

[NRS 361.013](#) defines a billboard as ". . . a sign that directs attention to a business, commodity, service, entertainment or attraction that is sold, offered or exists at a location other than the premises on which the sign is located."

[NRS 361.227](#) requires that depreciation of a billboard must be calculated at 1.5 percent of the cost of replacement for each year after the year of acquisition of the billboard, up to a maximum of 50 years. Additional information on the calculation of billboards may be found in NAC 361.1305.

Depreciation schedules and cost conversion factors apply to the 2025-26 Secured and Unsecured Tax Rolls. The 2025-26 Cost Conversion Index for Billboards may be found on pages 10-11 of this manual.

# LIFE EXPECTANCY GUIDELINES

## 2025-26 PERSONAL PROPERTY MANUAL

NAICS Industry Code.....Description.....Life in Years

### 11 AGRICULTURE AND FORESTRY

For the purposes of this manual, the following descriptions apply only to those items which can be classified as Personal Property. The designated life does not apply to Real Property or fixtures which have been converted to Real Property.

**111 Crop Production ..... 15**

Personal property includes machinery and equipment such as [tractors](#), [combines](#), [hay balers](#), [forage harvesters](#), unlicensed farm vehicles including [utility trailers](#), [wagons](#) and utensils used to grow crops mainly for food and fiber. The subsection comprises establishments, such as farms, orchards, groves, greenhouses, and nurseries, primarily engaged in growing crops, plants, vines, or trees (including Christmas trees) and their seeds.

**Itemized Equipment**

[Fertilizer Distribution](#) ..... 10  
Laser sending and receiving equipment ..... 10  
[Seed cleaning machinery](#) and equipment ..... 20  
[Seed cleaning equipment – portable](#) ..... 10

**112 Animal Production ..... 15**

Personal property includes machinery and equipment used to raise or fatten animals for the sale of animals or animal products. The subsection comprises establishments, such as ranches, farms, and feedlots primarily engaged in keeping, grazing, breeding, or feeding animals. These animals are kept for the products they produce or for eventual sale.

**Itemized Equipment**

1125 [Animal Aquaculture](#), including nets and pens ..... 7  
11212 [Dairy Production](#) ..... 15  
1123 [Egg Packing Equipment](#) ..... 20

**113 Forestry and Logging ..... 15**

Personal property includes machinery and equipment used to: (1) cut timber; (2) cut and transport timber; and (3) produce wood chips in the field, including stationary saw mills, skidders, and log loaders.

**Itemized Equipment**

Chain saws ..... 7  
[Portable saw mill](#) ..... 7

## 31 MANUFACTURING

For the purposes of this manual, the following descriptions apply only to those items which can be classified as Personal Property. The designated life does not apply to Real Property or fixtures which have been converted to Real Property.

### 311 Food ..... 15

Personal property used in this industry transform livestock and agricultural products into products for intermediate or final consumption. The food products manufactured in these establishments are typically sold to wholesalers or retailers for distribution to consumers, but establishments primarily engaged in retailing bakery and candy products made on the premises not for immediate consumption are included. Includes equipment such as [walk-in coolers](#), [freezers](#) and other [refrigeration](#), [grain tanks](#), [bottling](#) and [canning equipment](#) in the following industries:

- 3111 Animal food manufacturing
- 3112 Grain and oil seed milling
- 3113 Sugar and confectionery product manufacturing
- 3114 Fruit and vegetable preserving and specialty food manufacturing
- 31141 Frozen food manufacturing
- 31142 Fruit and vegetable canning
- 3115 Dairy product manufacturing
- 3116 Animal slaughtering and processing
- 3117 Seafood product preparation and packaging
- 3118 Bakeries and tortilla manufacturing
- 311811 Retail bakeries
- 311812 Commercial bakeries
- 3119 Other food manufacturing, such as honey processing

#### Itemized Equipment

- Cereal manufacturing ..... 20
- [Grain elevators](#), non-farm ..... 20
- Mechanical portion of [packing](#) and [sorting line equipment 2<sup>nd</sup> view](#) ..... 30
- Electronic portion of line equipment<sup>7</sup> ..... 10

### 312 Beverage and Tobacco Product Manufacturing ..... 15

Personal property used to manufacture beverages and tobacco products. Please note that ice manufacturing, while not a beverage, is included with nonalcoholic beverage manufacturing because it uses the same production process as water purification.

<sup>7</sup> If electronic component's original cost cannot be separated from other line assets, use 20 years.

312	<p><b>Beverage and Tobacco Product Manufacturing <i>continuation...</i></b></p> <p>Manufacturing processes include:</p> <p>31211      Soft drink manufacturing</p> <p>31212      Breweries</p> <p>31213      Wineries</p> <p>31214      Distilleries</p> <p><b>Itemized Equipment</b></p> <p>Cold Storage and Ice-making equipment ..... 20</p>
313	<p><b>Textile Mills ..... 15</b></p> <p>Personal property used in the main processes in this industry which include preparation and spinning of fiber, knitting or weaving of fabric, and the finishing of the textile.</p>
314	<p><b>Textile Product ..... 15</b></p> <p>Personal property used in creation of textile products. With a few exceptions, processes used in this industry are generally cut and sew (i.e., purchasing fabric and cutting and sewing to make non-apparel textile products, such as sheets and towels).</p>
315	<p><b>Apparel Manufacturing ..... 15</b></p> <p>Personal property used in the Apparel Manufacturing industry. This industry includes a diverse range of establishments manufacturing full lines of ready-to-wear apparel and custom apparel: apparel contractors, performing cutting or sewing operations on materials owned by others; jobbers performing entrepreneurial functions involved in apparel manufacture; and tailors, manufacturing custom garments for individual clients.</p>
316	<p><b>Leather and Allied Product Manufacturing ..... 15</b></p> <p>Personal property used to transform hides into leather by tanning or curing and fabricating the leather into products for final consumption. It also includes the manufacture of similar products from other materials, including products (except apparel) made from "leather substitutes," such as rubber, plastics, or textiles It includes dyeing or dressing furs.</p>
321	<p><b>Wood Product Manufacturing..... 15</b></p> <p>The production processes of the Wood Product Manufacturing sub sector include sawing, planing, shaping, laminating, and assembling of wood products starting from logs that are cut into bolts, or lumber that then may be further cut, or shaped by <a href="#">lathes</a> or other <a href="#">shaping tools</a>. The lumber or other transformed wood shapes may also be subsequently planed or smoothed, and assembled into finished products, such as wood containers.</p>

322	<b>Paper Manufacturing</b> .....	15
3221	<b>Pulp, paper and paperboards mills</b> .....	15
	Personal property used in the manufacturing of pulp and involves separating the cellulose fibers from other impurities in wood or used paper. The manufacturing of paper involves matting these fibers into a sheet.	
3222	<b>Converted Paper Product Manufacturing</b> .....	15
	Personal property used in the manufacture of paperboard containers including corrugating, cutting, and shaping machinery to form paperboard into containers. Paper bag and coated and treated paper manufacturing establishments cut and coat paper and foil. Stationery product manufacturing establishments make a variety of paper products used for writing, filing, and similar applications. Other converted paper product manufacturing includes, in particular, the conversion of sanitary paper stock into such things as tissue paper and disposable diapers.	
323	<b>Printing and related support activities</b> .....	15
	Personal property including presses, used to transfer an image from a plate, screen, film, or computer file to some medium, such as paper, plastics, metal, textile articles, or wood. The most prominent of these methods is to transfer the image from a plate or screen to the medium (lithographic, gravure, screen, and flexographic printing). When publishing and printing are done in the same establishment, the establishment is classified under Industry Code 51, Information.	
	<b>Itemized Equipment</b>	
	<a href="#">Digital</a> or <a href="#">non-impact printing equipment</a> .....	5
	(Uses a computer file to directly “drive” the printing mechanism to create the image)	
	<a href="#">Blue Print Machines</a> .....	15
	<a href="#">Blue Print Machines – small table model</a> .....	7
	<a href="#">3-D Printers</a> .....	7
324	<b>Petroleum and Coal Products Manufacturing</b> .....	20
	Personal property used to transform crude petroleum and coal into usable products. The dominant process is petroleum refining that involves the separation of crude petroleum into component products through such techniques as cracking and distillation. Products such as <a href="#">asphalt coatings</a> and petroleum lubricating oils are made.	

325	<b>Chemical Manufacturing</b> .....	15
3251	<b>Basic Chemical Manufacturing</b> .....	15
	Personal property used in both basic chemical processes, such as thermal cracking and distillation, and in petrochemical processes, such as (1) manufacturing acyclic (i.e., aliphatic) hydrocarbons such as ethylene, propylene, and butylenes made from refined petroleum or liquid hydrocarbon and/or (2) manufacturing cyclic aromatic hydrocarbons such as benzene, toluene, styrene, xylene, ethyl benzene, and cumene made from refined petroleum or liquid hydrocarbons.	
3254	<b>Pharmaceutical and Medicine Manufacturing</b> .....	15
	Personal property used in one or more of the following: (1) manufacturing biological and medicinal products; (2) processing (i.e., <a href="#">grading</a> , <a href="#">grinding</a> , and <a href="#">milling</a> ) botanical drugs and herbs; (3) isolating active medicinal principals from botanical drugs and herbs; and (4) manufacturing pharmaceutical products intended for internal and external consumption in such forms as <a href="#">ampoules</a> , <a href="#">tablets</a> , capsules, vials, ointments, powders, solutions, and suspensions.	
3255	<b>Paint, Coating, and Adhesive Manufacturing</b> .....	15
	Personal property used to (1) mix pigments, solvents, and binders into paints and other coatings, such as stains, varnishes, lacquers, enamels, shellacs, and water repellant coatings for concrete and masonry, and/or (2) manufacture allied paint products, such as putties, paint and varnish removers, paint brush cleaners, and <a href="#">frit</a> .	
326	<b>Plastics and Rubber Products</b> .....	15
3261	<b>Plastics Product Manufacturing</b> .....	15
	Personal property used in processing new or spent (i.e., recycled) plastics resins into intermediate or final products, using such processes as <a href="#">compression molding</a> ; <a href="#">extrusion molding</a> ; <a href="#">injection molding</a> ; <a href="#">blow molding</a> ; and <a href="#">casting</a> .	
	<b>Itemized Equipment</b>	
	Special tools .....	7
3262	<b>Rubber Product Manufacturing</b> .....	15
	Personal property used in the industry group comprised of establishments primarily engaged in processing natural, and synthetic or reclaimed rubber materials into intermediate or final products using processes such as vulcanizing, <a href="#">cementing</a> , <a href="#">molding</a> , <a href="#">extruding</a> , and <a href="#">lathe-cutting</a> .	
	<b>Itemized Equipment</b>	
	Special tools .....	7

**Nonmetallic Mineral Product..... 20**

Personal property used to transform mined or quarried nonmetallic minerals, such as sand, gravel, stone, clay, and [refractory materials](#), into products for intermediate or final consumption. Processes used include grinding, mixing, cutting, shaping, and honing.

**3271 Clay Product and Refractory Manufacturing ..... 15**

Personal property used in shaping, molding, glazing, and firing pottery, ceramics, and plumbing fixtures made entirely or partly of clay or other ceramic materials.

**3272 Glass and Glass Product Manufacturing ..... 15**

Personal property used in manufacturing glass and/or glass products. Establishments in this industry may manufacture glass and/or glass products by melting silica sand or cullet or purchasing glass.

**Itemized Equipment**

Special tools ..... 5

**3273 Cement and Concrete Product Manufacturing ..... 20**

Personal property used in manufacturing Portland, natural, masonry, pozzalanic, and other hydraulic cements.

**Itemized Equipment**

[Quarry equipment](#){XE "quarry equipment"} ([Yahoo search](#))..... 15

[Portable ready-mix plants](#) ..... 15

**3274 Lime and Gypsum Product Manufacturing ..... 20**

Personal property used in [manufacturing lime](#) from calcitic limestone, dolomitic limestone, or other calcareous materials, such as coral, chalk, and shells. Lime manufacturing establishments may mine, quarry, collect, or purchase the sources of calcium carbonate.

**3279 Abrasive Product Manufacturing..... 20**

Personal property used in manufacturing abrasive grinding wheels of natural or synthetic materials, abrasive-coated products, and other abrasive products.

**327991 Cut Stone and Stone Product Manufacturing..... 15**

Personal property used in cutting, shaping, and finishing granite, marble, limestone, slate, and other stone for building and miscellaneous uses. Stone product manufacturing establishments may mine, quarry, or purchase stone.

331	<p><b>Primary Metal Manufacturing</b> ..... 20</p> <p>Personal property used to smelt and/or refine ferrous and nonferrous metals from ore, pig or scrap, using electrometallurgical and other process metallurgical techniques. Metal alloys and super alloys are also manufactured by introducing other chemical elements to pure metals. The output of smelting and refining, usually in ingot form, is used in rolling, drawing, and extruding operations to make sheet, strip, bar, rod, or wire, and in molten form to make castings and other basic metal products.</p> <p>Includes:</p> <p>3311      Iron and Steel Mills and Ferroalloy Manufacturing</p> <p><b>Itemized Equipment</b></p> <p>Special Tools ..... 7</p>
332	<p><b>Fabricated Metal Product Manufacturing</b> ..... 15</p> <p>Personal property is used to transform metal into intermediate or end products, other than machinery, computers and electronics, and metal furniture or treating metals and metal formed products fabricated elsewhere. Important fabricated metal processes are forging, stamping, bending, forming, and machining, used to shape individual pieces of metal; and other processes, such as welding and assembling, used to join separate parts together.</p> <p><b>Itemized Equipment</b></p> <p>Special Tools ..... 5</p>
333	<p><b>Machinery Manufacturing</b>..... 15</p> <p>Personal property used to create end products that apply mechanical force, for example, the application of gears and levers, to perform work. Some important processes for the manufacture of machinery are <a href="#">forging</a>, <a href="#">stamping</a>, <a href="#">bending</a>, <a href="#">forming</a>, and <a href="#">machining</a> that are used to shape individual pieces of metal. Processes, such as welding and assembling are used to join separate parts together. Although these processes are similar to those used in metal fabricating establishments, machinery manufacturing is different because it typically employs multiple <a href="#">metal forming processes</a> in manufacturing the various parts of the machine.</p> <p>333314      <b>Optical Instrument and Lens Manufacturing</b> ..... 15</p> <p>Personal property used in: (1) <a href="#">manufacturing optical instruments and lens</a>, such as binoculars, microscopes (except electron, proton), telescopes, prisms, and lenses (except ophthalmic); (2) coating or polishing lenses (except ophthalmic); and (3) mounting lenses (except ophthalmic).</p>
334	<p><b>Computer and Electronic Product Manufacturing</b> .....7</p> <p>Personal property <a href="#">used in the manufacture of computers</a>, computer peripherals, communications equipment, and similar electronic products and components. The design and use of integrated circuits and the application of highly specialized miniaturization</p>

technologies are common elements in the production technologies of the computer and electronic industry.

**3341 Computer and Peripheral Equipment Manufacturing .....7**

Personal property [used in manufacturing and/or assembling electronic computers](#), such as mainframes, personal computers, workstations, laptops, and computer servers; and computer peripheral equipment, such as storage devices, printers, monitors, input/output devices and terminals.

Personal property [used in manufacturing wire telephone and data communications equipment](#). These products may be standalone or board-level components of a larger system. Examples of products made by these establishments are [central office switching equipment](#), cordless telephones (except cellular), [PBX equipment](#), telephones, telephone answering machines, [LAN modems](#), [multi-user modems](#), and other [data communications equipment](#), such as bridges, hubs, routers, and gateways.

**3343 Audio and Video Equipment Manufacturing ..... 10**

Personal property used in manufacturing electronic audio and video equipment for home entertainment, motor vehicle, public address and musical instrument amplifications. Examples of products made include video cassette recorders, televisions, stereo equipment, speaker systems, household-type video cameras, jukeboxes, and amplifiers for musical instruments and public address systems.

**3344 Semiconductor and Other Electronic Components ..... 5**

Personal property [used in manufacturing semiconductors](#) and other components for electronic applications. Examples of products made by these establishments are capacitors, resistors, microprocessors, bare and loaded printed circuit boards, electron tubes, electronic connectors, and computer modems.

Includes:

[clean room equipment](#), [crystal growing equipment](#), [deionized water systems](#), [encapsulation equipment](#), photo mask and wafer manufacturing equipment, semiconductor chemical and gas systems, semiconductor electrical systems, and semiconductor test equipment.

**3345 Navigation, Measuring, Medical, Control Instrument Manufacturing ..... 7**

Personal property used in manufacturing navigational, measuring, electro medical, and control instruments. Examples of products made by these establishments are aeronautical instruments, appliance regulators and controls (except switches), laboratory analytical instruments, navigation and guidance systems, and physical properties testing equipment.

**335 Electrical Equipment, Appliance, and Component Manufacturing ..... 15**

Personal property used to manufacture products that [generate](#), [distribute](#) and use [electrical power](#), such as electric lamp bulbs, lighting fixtures, small and major electrical appliances, electric motors, generators, transformers, switchgear apparatus, devices for storing electrical power (e.g., batteries), for transmitting electricity (e.g., insulated wire), and wiring devices (e.g., electrical outlets, fuse boxes, and light switches).

**336 Transportation Equipment Manufacturing ..... 15**

Personal property used in production processes similar to those of other machinery manufacturing establishments - bending, forming, welding, machining, and assembling metal or plastic parts into components and finished products.

The section includes:

3361 Motor Vehicle Manufacturing

3362 Motor Vehicle Body & Trailer Manufacturing

3363 Motor Vehicle Parts Manufacturing

3365 Railroad Rolling Stock Manufacturing

**3364 Aerospace Product and Parts Manufacturing..... 15**

Personal property used in one or more of the following: (1) manufacturing complete aircraft, missiles, or space vehicles; (2) manufacturing aerospace engines, propulsion units, auxiliary equipment or parts; (3) developing and making prototypes of aerospace products; (4) aircraft conversion (i.e., major modifications to systems); and (5) [complete aircraft or propulsion systems overhaul](#) and rebuilding (i.e., periodic restoration of aircraft to original design specifications).

This section includes:

336412 Aircraft Engine and Engine Parts Manufacturing

**337 Furniture and Related Product Manufacturing ..... 10**

Personal property used to make furniture and related articles, such as mattresses, window blinds, cabinets, and fixtures. The processes used in the manufacture of furniture include the cutting, bending, molding, laminating, and assembly of such materials as wood, metal, glass, plastics, and rattan.

339            **Miscellaneous Manufacturing** ..... 15

Personal property used in the manufacture of products as diverse as medical equipment and supplies, jewelry, sporting goods, toys, and office supplies.

33991        **Jewelry and Silverware Manufacturing** ..... 15

Personal property used in: (1) manufacturing, engraving, chasing, or etching jewelry; (2) manufacturing metal personal goods (i.e., small articles carried on or about the person, such as compacts or cigarette cases); (3) manufacturing, engraving, chasing, or etching precious metal solid, precious metal clad, or pewter cutlery and flatware; (4) manufacturing, engraving, chasing, or etching personal metal goods (i.e., small articles carried on or about the person, such as compacts or cigarette cases); (5) stamping coins; (6) manufacturing unassembled jewelry parts and stock shop products, such as sheet, wire, and tubing; (7) cutting, slabbing, tumbling, carving, engraving, polishing, or faceting precious or semiprecious stones and gems; (8) re-cutting, re-polishing, and setting gem stones; and (9) drilling, sawing, and peeling cultured and costume pearls.

454	Non-store Retailers.....	15

See also separate listings for specific types of equipment.

## 48 TRANSPORTATION AND WAREHOUSING

For the purposes of this manual, the following descriptions apply only to those items which can be classified as Personal Property. The designated life does not apply to Real Property or fixtures which have been converted to Real Property.

481	Air Transportation .....	20
-----	--------------------------	----

Personal property includes most airplanes; helicopters (rotorcraft); drones weighing over 50 pounds; and aircraft, all of which have a life of 20 years. There are some exceptions, which are itemized below.

**Itemized Equipment**

	Kit built Aircraft .....	15
	Gliders .....	15
	Hot Air Balloons .....	15
	Experimental Aircraft.....	15
	Drones weighing 50 pounds or less.....	10

482	<b>Rail Transportation.....</b>	<b>20</b>
	482112 <b>Short Line Railroads</b>	
	<b>Itemized Equipment</b>	
	Railroad Rolling Stock .....	20
483	<b>Water Transportation .....</b>	<b>20</b>
	Personal property used in providing inland water transportation of passengers and/or cargo on lakes, rivers, or intracoastal waterways.	
484	<b>Truck Transportation .....</b>	<b>10</b>
	<b>Itemized Equipment</b>	
	Light Trucks .....	7
	General freight Trucks .....	10
	Tractor-trailers .....	10
485	<b>Transit and Ground Passenger Transportation .....</b>	<b>10</b>
	Personal property includes equipment used in Transit and Ground Passenger Transportation. This industry includes a variety of passenger transportation activities, such as urban transit systems; chartered bus, school bus, and interurban bus transportation and taxis.	
	<b>Itemized Equipment</b>	
	Buses.....	15
	Automobiles, unlicensed .....	7
492	<b>Couriers and Messengers .....</b>	<b>15</b>
	Personal property used in the provision of intercity and/or local delivery of parcels. These articles can be described as those that may be handled by one person without using special equipment. Messengers, which usually deliver within a metropolitan or single urban area, may use bicycle, foot, small truck, or van.	
493	<b>Warehousing and Storage.....</b>	<b>15</b>
	Personal property used in operating warehousing and storage{XE "storage:} facilities for general merchandise, refrigerated goods, and other warehouse products. These establishments provide facilities to store goods. They do not sell the goods they handle.	

## 51 INFORMATION

---

For the purposes of this manual, the following descriptions apply only to those items which can be classified as Personal Property. The designated life does not apply to Real Property or fixtures which have been converted to Real Property.

511	<b>Publishing Industries</b> .....	15
	Personal property used in the publishing of newspapers, magazines, other periodicals, and books, as well as directory and mailing list and software publishing.	
512	<b>Motion Picture Production and Sound Recording</b> .....	7
	Personal property used in the production and/or distribution of motion pictures, videos, television programs, or commercials; in the exhibition of motion pictures; or in the provision of postproduction and related services. Sound recording machinery and equipment is used in producing and distributing musical recordings, in publishing music, or in providing sound recording and related services.	
	512131 <b>Motion Picture Theaters</b> .....	15
	Includes projection equipment, furniture and trade fixtures.	
515	<b>Broadcasting and Telecommunications</b> .....	<i>See Categories</i>
	51511 <b>Radio Broadcasting</b> .....	10
	Personal property used in broadcasting audio signals. These establishments operate radio broadcasting studios and facilities for the transmission of aural programming by radio to the public, to affiliates, or to subscribers. In recognition of the FCC change from analog to digital broadcasting equipment in radio, television, and cable industries, all analog equipment MAY be valued using a seven-year life. All other equipment will remain at the life indicated. The assessor will still be responsible for measuring obsolescence if any.	
	<b>Itemized Equipment</b>	
	Radio Production Equipment .....	7
	Service and Repair Equipment .....	10
	51512 <b>Television Broadcasting</b> .....	10
	Personal property used in broadcasting images together with sound. These establishments operate television broadcasting studios and facilities for the programming and transmission of programs to the public. In recognition of the FCC mandated change from analog to digital broadcasting equipment in radio, television, and cable industries, all analog equipment MAY be valued using a three-year life. All other equipment will remain at the life indicated. The assessor will still be responsible for measuring obsolescence if any.	
	<b>Itemized Equipment</b>	
	Television Production Equipment .....	7
	Service and Repair Equipment .....	10

**Telecommunications ..... See Itemized Equipment**

Wired telecommunications personal property used in (1) operating and maintaining switching and transmission facilities to provide point-to-point communications via landlines, microwave, or a combination of landlines and satellite linkups or (2) furnishing telegraph and other non-vocal communications using their own facilities. Wireless telecommunications assets are used in operating and maintaining switching and transmission facilities that provide omni-directional communications via airwaves, such as cellular telephone or paging services. For handheld devices used to take electronic payments, see Point-of-Sale descriptions.

Station Equipment .....	10
Telephone equipment, including, telex, facsimile and Two-Way Radio .....	5
Cellular Telephones, Smartphones, Hand-helds, Tablets and POS Tablets, and PDAs.....	3

**517110 Cable and Other Program Distribution .... See Itemized Equipment**

Personal property used in distribution systems for broadcast programming. Head end assets are defined as the electronic control center -- generally located at the antenna site of a CATV system -- usually including antennas, preamplifiers, frequency converters, demodulators, modulators and other related equipment which amplify, filter and convert incoming broadcast TV signals to cable system channels. Microwave systems include assets such as antennas, transmitting and receiving equipment, and broad band microwave assets. Program origination equipment includes assets such as cameras, film chains, video tape recorders, lighting, and remote location equipment excluding vehicles. Service and test assets include oscilloscopes, field strength meters, spectrum analyzers, and cable testing equipment. Subscriber connection and distribution systems include assets such as trunk and feeder cable, connecting hardware, amplifiers, power equipment, passive devices, directional taps, pedestals, pressure taps, drop cables, matching transformers, multiple set connector equipment, and converters. In recognition of the FCC mandated change from analog to digital broadcasting equipment in radio, television, and cable industries all analog equipment MAY be valued using a seven-year life. All other equipment will remain at the life indicated. The assessor will still be responsible for measuring obsolescence if any.

**518 Internet Service Providers, Web Search Portals, and Data Processing Services**

*For life expectancy, please see Special Properties*

Personal property assets used by Internet Service Providers, Web Search Portals, and Data Processing Services to provide: (1) access to the Internet; (2) search facilities for the Internet; and (3) data processing, hosting, and related services.

**519 Other Information Services ..... 15**

Personal property assets used in supplying information, storing information, providing access to information, and searching and retrieving information. The main components of this group are news syndicates, libraries, and archives. It includes law and medical libraries.

**5 3 REAL ESTATE, RENTAL, AND LEASING**

**For the purposes of this manual, the following descriptions apply only to those items which can be classified as Personal Property. The designated life does not apply to Real Property or fixtures which have been converted to Real Property.**

**532 Rental and Leasing Services ..... 15**

Personal property includes a wide array of tangible goods, such as automobiles, computers, consumer goods, and industrial machinery and equipment, to customers in return for a periodic rental or lease payment.

#### Nevada Revised Statutes

**NRS 361.013 “Billboard” defined.** “Billboard” means a sign that directs attention to a business, commodity, service, entertainment or attraction that is sold, offered or exists at a location other than the premises on which the sign is located.

(Added to NRS by [1989, 1817](#))

**NRS 361.028 “Manufactured home” defined.** “Manufactured home” has the meaning ascribed to it in [NRS 489.113](#).

(Added to NRS by [2001, 1540](#))

**NRS 361.029 “Mobile home” defined.** “Mobile home” means a vehicular structure, built on a chassis or frame, which is designed to be used with or without a permanent foundation and is capable of being drawn by a motor vehicle. It may be used as a dwelling when connected to utilities or may be used permanently or temporarily for the advertising, sales, display or promotion of merchandise or services. The term does not include a recreational park trailer as defined in [NRS 482.1005](#).

(Added to NRS by [1989, 169](#); A [2001, 1727](#))

**NRS 361.030 “Personal property” defined.**

1. “Personal property” means:
  - (a) All household and kitchen furniture.
  - (b) All law, medical and miscellaneous libraries.
  - (c) All goods, wares and merchandise.
  - (d) All chattels of every kind and description, except vehicles as defined in [NRS 371.020](#).
  - (e) Stocks of goods on hand.
  - (f) Any vehicle not included in the definition of vehicle in [NRS 371.020](#).
  - (g) All locomotives, cars, rolling stock and other personal property used in operating any railroad within the State.
  - (h) All machines and machinery, all works and improvements, all steamers, vessels and watercraft of every kind and name navigating or used upon the waters of any river or lake within this State or having a general depot or terminus within this State.
  - (i) The money, property and effects of every kind, except real estate, of all banks, banking institutions or firms, bankers, moneylenders and brokers.
  - (j) All property of whatever kind or nature, except vehicles as defined in [NRS 371.020](#), not included in the term “real estate” as that term is defined in [NRS 361.035](#).

2. Gold-bearing and silver-bearing ores, quartz or minerals from which gold or silver is extracted, when in the hands of the producers thereof, shall not mean, not be taken to mean, nor be listed and assessed under the term “personal property” as used in this section, but are specially excepted therefrom, and shall be listed, assessed and taxed as provided by law. [Part 3:344:1953]—(NRS A 1963, 305, 1121; [1983, 1191](#); [2013, 3115](#))

**NRS 361.035 “Real estate” and “real property” defined.**

1. "Real estate" or "real property" means:
  - (a) All houses, buildings, fences, ditches, structures, erections, railroads, toll roads and bridges, or other improvements built or erected upon any land, whether such land is private property or property of this state or of the United States, or of any municipal or other corporation, or of any county, city or town in this state.
  - (b) Any mobile home, factory-built housing or manufactured home which meets the requirements of [NRS 361.244](#).
  - (c) The ownership of, or claim to, or possession of, or right of possession to any lands within this state.
  - (d) The claim by or the possession of any person, firm, corporation, association or company to any land.
2. The property described in subsection 1 must be listed under the head of "real estate."
3. Except as otherwise provided in [NRS 361.2445](#), when an agreement has been entered into, whether in writing or not, or when there is sufficient reason to believe that an agreement has been entered into, for the dismantling, moving or carrying away or wrecking of the property described in subsection 1, the property must be classified as personal property, and not real estate.
4. For the purposes of this chapter, "real estate" or "real property" does not include leasehold or other possessory interests in land owned by the Federal Government on which land the Federal Government is paying taxes to the State of Nevada or is, pursuant to contractual obligation, paying any sum in lieu of taxes to the State of Nevada.  
[Part 3:344:1953]—(NRS A 1957, 358; 1975, 1655; [1979, 824](#); [1993, 1183](#); [1999, 3465](#))

**NRS 361.045 Taxable property.** Except as otherwise provided by law, all property of every kind and nature whatever within this state shall be subject to taxation.

[Part 1:344:1953; A 1954, 29; 1955, 340]

**NRS 361.227 Determination of taxable value.**

1. Any person determining the taxable value of real property shall appraise:
  - (a) The full cash value of:
    - (1) Vacant land by considering the uses to which it may lawfully be put, any legal or physical restrictions upon those uses, the character of the terrain, and the uses of other land in the vicinity.
    - (2) Improved land consistently with the use to which the improvements are being put.
  - (b) Any improvements made on the land by subtracting from the cost of replacement of the improvements all applicable depreciation and obsolescence. Depreciation of an improvement made on real property must be calculated at 1.5 percent of the cost of replacement for each year of adjusted actual age of the improvement, up to a maximum of 50 years.
2. The unit of appraisal must be a single parcel unless:
  - (a) The location of the improvements causes two or more parcels to function as a single parcel;
  - (b) The parcel is one of a group of contiguous parcels which qualifies for valuation as a subdivision pursuant to the regulations of the Nevada Tax Commission; or
  - (c) In the professional judgment of the person determining the taxable value, the parcel is one of a group of parcels which should be valued as a collective unit.
3. The taxable value of a leasehold interest, possessory interest, beneficial interest or beneficial use for the purpose of [NRS 361.157](#) or [361.159](#) must be determined in the same manner as the taxable value of the property would otherwise be determined if the lessee or user of the property was the owner of the property and it was not exempt from taxation, except that the taxable value so determined must be reduced by a percentage of the taxable value that is equal to the:
  - (a) Percentage of the property that is not actually leased by the lessee or used by the user during the fiscal year; and
  - (b) Percentage of time that the property is not actually leased by the lessee or used by the user during the fiscal year, which must be determined in accordance with [NRS 361.2275](#).
4. The taxable value of other taxable personal property, except a mobile or manufactured home, must be determined by subtracting from the cost of replacement of the property all applicable depreciation and obsolescence. Depreciation of a billboard must be calculated at 1.5 percent of the cost of replacement for each year after the year of acquisition of the billboard, up to a maximum of 50 years.
5. The computed taxable value of any property must not exceed its full cash value. Each person determining the taxable value of property shall reduce it if necessary to comply with this requirement. A person determining whether taxable value exceeds that full cash value or whether obsolescence is a factor in valuation may consider:
  - (a) Comparative sales, based on prices actually paid in market transactions.
  - (b) A summation of the estimated full cash value of the land and contributory value of the improvements.
  - (c) Capitalization of the fair economic income expectancy or fair economic rent, or an analysis of the discounted cash flow.

↳ A county assessor is required to make the reduction prescribed in this subsection if the owner calls to his or her attention the facts warranting it, if the county assessor discovers those facts during physical reappraisal of the property or if the county assessor is otherwise aware of those facts.

6. The Nevada Tax Commission shall, by regulation, establish:

(a) Standards for determining the cost of replacement of improvements of various kinds.

(b) Standards for determining the cost of replacement of personal property of various kinds. The standards must include a separate index of factors for application to the acquisition cost of a billboard to determine its replacement cost.

(c) Schedules of depreciation for personal property based on its estimated life.

(d) Criteria for the valuation of two or more parcels as a subdivision.

7. In determining, for the purpose of computing taxable value, the cost of replacement of:

(a) Any personal property, the cost of all improvements of the personal property, including any additions to or renovations of the personal property, but excluding routine maintenance and repairs, must be added to the cost of acquisition of the personal property.

(b) An improvement made on land, a county assessor may use any final representations of the improvement prepared by the architect or builder of the improvement, including, without limitation, any final building plans, drawings, sketches and surveys, and any specifications included in such representations, as a basis for establishing any relevant measurements of size or quantity.

8. The county assessor shall, upon the request of the owner, furnish within 15 days to the owner a copy of the most recent appraisal of the property, including, without limitation, copies of any sales data, materials presented on appeal to the county board of equalization or State Board of Equalization and other materials used to determine or defend the taxable value of the property.

9. The provisions of this section do not apply to property which is assessed pursuant to [NRS 361.320](#).

(Added to NRS by 1965, 1445; A 1969, 1451; 1975, 65, 1656; [1977, 1318](#); [1979, 79](#); [1981, 788, 789](#); [1983, 1047, 1884, 1885](#); [1987, 2075](#); [1989, 668, 1818](#); [1993, 2312](#); [1997, 1111](#); [1999, 1029](#); [2001, 842](#); [2003, 2758](#); [2009, 1216](#); [2013, 3116](#))

**NRS 361.265 Written statement concerning personal property: Demand; contents; return of statement; valuation of unlisted property claimed by absent or unknown person; penalties.**

1. To enable the county assessor to make assessments, he or she shall demand from each natural person or firm, and from the president, cashier, treasurer or managing agent of each corporation, association or company, including all banking institutions, associations or firms within the county, a written statement, signed under penalty of perjury, on forms and in the format prescribed by the county assessor of all the personal property within the county, owned, claimed, possessed, controlled or managed by those persons, firms, corporations, associations or companies. The signature required by this subsection may include an electronic signature as defined in [NRS 719.100](#).

2. The statement must include:

(a) A description of the location of any taxable personal property that is owned, claimed, possessed, controlled or managed by the natural person, firm, corporation, association or company, but stored, maintained or otherwise placed at a location other than the principal residence of the natural person or principal place of business of the firm, corporation, association or company;

(b) The cost of acquisition of each item of taxable personal property including the cost of any improvements of the personal property, such as additions to or renovations of the property other than routine maintenance or repairs, and the year in which each item of taxable personal property was acquired; and

(c) If the natural person, firm, corporation, association or company owns at least 25 mobile or manufactured homes that are being leased within the county for commercial purposes, and those homes have not been converted to real property pursuant to [NRS 361.244](#), the year, make or model, size, serial number and location of each such mobile or manufactured home.

3. The statement must be returned not later than July 31, except for a statement mailed to the taxpayer after July 15, in which case it must be returned within 15 days after demand for its return is made. Upon petition of the property owner showing good cause, the county assessor may grant one or more 30-day extensions.

4. If the owners of any taxable property not listed by another person are absent or unknown, or fail to provide the written statement as described in subsection 1, the county assessor shall make an estimate of the value of the property and assess it accordingly. If the name of the absent owner is known to the county assessor, the property must be assessed in that name. If the name of the owner is unknown to the county assessor, the property must be assessed to "unknown

owner,” but no mistake made in the name of the owner or the supposed owner of personal property renders the assessment or any sale of the property for taxes invalid.

5. If any person, officer or agent neglects or refuses on demand of the county assessor or his or her deputy to give the statement required by this section, or gives a false name, or refuses to give his or her name or sign the statement, the person, officer or agent is guilty of a misdemeanor.

[Part 5:344:1953]—(NRS A 1967, 558; 1969, 1452; [1981, 327](#); [1983, 519, 1193](#); [1985, 748](#); [1987, 531](#); [1989, 1820](#); [2003, 2761](#); [2005, 2656](#))

### **NRS 361.325 Nevada Tax Commission to establish valuations of mobile homes and land; property escaping taxation to be placed on assessment roll.**

1. On or before the first Monday in June of each year, the Nevada Tax Commission shall:

(a) Fix and establish the valuation for assessment purposes of all mobile homes in the State.

(b) Classify land and fix and establish the valuation thereof for assessment purposes. The classification of agricultural land must be made on the basis of crop, timber or forage production, either in tons of crops per acre, board feet or other unit, or animal unit months of forage. An animal unit month is the amount of forage which is necessary for the complete sustenance of one animal unit for 1 month. One animal unit is defined as one cow and calf, or its equivalent, and the amount of forage necessary to sustain one animal unit for 1 month is defined as 900 pounds of dry weight forage.

2. The valuation of mobile homes and land so fixed and established is for the next succeeding year and is subject to equalization by the State Board of Equalization.

3. In establishing the value of new mobile homes sold on or after July 1, 1982, the Nevada Tax Commission shall classify them according to those factors which most closely determine their useful lives. In establishing the value of other mobile homes, the Commission shall begin with the retail selling price and depreciate it by 5 percent per year, but not below 20 percent of its original amount.

4. The Nevada Tax Commission shall cause to be placed on the assessment roll of any county property found to be escaping taxation coming to its knowledge after the adjournment of the State Board of Equalization. This property must be placed upon the assessment roll prior to the delivery thereof to the ex officio tax receiver. If such property cannot be placed upon the assessment roll of the proper county within the proper time, it must be placed upon the tax roll for the next ensuing year, in addition to the assessment for the current year, if any, and taxes thereon must be collected for the prior year in the same amount as though collected upon the prior year’s assessment roll.

5. The Nevada Tax Commission shall not raise or lower any valuations established by the State Board of Equalization unless, by the addition to any assessment roll of property found to be escaping taxation, it is necessary to do so.

6. Nothing in this section provides an appeal from the acts of the State Board of Equalization to the Nevada Tax Commission.

[7:177:1917; A 1929, 299; 1939, 279; 1945, 78; 1953, 576]—(NRS A 1957, 314; 1963, 1123; 1967, 825; 1975, 1105, 1660, 1762; [1981, 859](#); [1983, 1195](#))

## **Nevada Administrative Code**

**NAC 361.1127 “Fixture” defined.** ([NRS 360.090, 360.250](#)) “Fixture” means an item, other than a trade fixture, that was originally personal property which has been installed or attached to land or an improvement in a permanent manner. As used in this section, “installed or attached to land or an improvement in a permanent manner” means that:

1. Either:

(a) An item is attached to, imbedded in or permanently resting upon land or an improvement, or is attached by other means that are normally used for permanent installation, and cannot be removed without substantially damaging the item or the land or improvement with which it is being used; or

(b) The use or purpose of an item that is not otherwise physically annexed to land or an improvement is so adapted that it is:

(1) A necessary, integral or working part of the land or improvement;

(2) Designed or committed for use with the land or improvement; or

(3) So essential to the land or improvement that the land or improvement cannot perform its desired function without the nonattached item; and

2. A reasonable person would consider the item to be a permanent part of the land or improvement, taking into account annexation, adaptation and other objective manifestations of permanence, including, without limitation, whether:

(a) Removal of the item would destroy the item or cause significant damage to the real property to which it is installed or attached;

(b) The historic use of the item indicates an intention to leave the item in place;

(c) The terms of a written agreement between parties indicates the intention of a tenant or lessee to remove or transfer ownership of the item; or

(d) Ownership of the item would be conveyed with a transfer of the real property to which it is installed or attached.

(Added to NAC by Tax Comm'n by R039-10, 8-13-2010, eff. 7-1-2012; A by R068-12, 9-14-2012)

**NAC 361.11715 "Real property" defined.** ([NRS 360.090](#), [360.250](#))

1. "Real property" has the meaning ascribed to it in [NRS 361.035](#) and includes:

(a) Land;

(b) Fixtures;

(c) Improvements;

(d) On-site enhancements; and

(e) Any rights, interests, benefits and privileges belonging or attached to the land.

2. The term does not include a trade fixture.

(Added to NAC by Tax Comm'n by R039-10, 8-13-2010, eff. 7-1-2012; A by R068-12, 9-14-2012)

**NAC 361.130 Mobile or manufactured home.** ([NRS 360.090](#), [360.250](#), [361.227](#), [361.2445](#), [361.325](#))

1. The taxable value of a mobile home or manufactured home which constitutes real property is the cost of replacement of the mobile home or manufactured home less depreciation and obsolescence.

2. In determining the taxable value of a mobile home or manufactured home which constitutes personal property, each county assessor shall, if the mobile home or manufactured home was sold as new:

(a) Before July 1, 1982, value it at its retail selling price when sold to the original owner less depreciation at 5 percent per year, to a maximum depreciated value of 20 percent of its original retail selling price.

(b) On or after July 1, 1982, value it at replacement cost, when new, less depreciation. Replacement cost when new is the retail selling price to the original owner adjusted by factors reflected in the annual *Personal Property Manual*.

➤ Depreciation must be calculated pursuant to the schedule located in the annual *Personal Property Manual*. Additional depreciation and obsolescence may be calculated separately.

3. The retail selling price of a mobile home or manufactured home includes all charges for transportation, installation, accessories, profit and overhead.

4. If the owner of a mobile home or manufactured home which has been converted to real property wishes to convert the mobile home or manufactured home back to personal property, the county assessor shall provide the owner with a form for an affidavit of conversion which has been approved by the Commission and which must be recorded in the county recorder's office pursuant to [NRS 361.2445](#) before the mobile home or manufactured home may be removed from the tax rolls. The affidavit of conversion may include information concerning the cost of acquisition of the mobile home or manufactured home. All signatures required pursuant to [NRS 361.2445](#) to effectuate the conversion must be notarized.

5. The county assessor shall value the mobile home or manufactured home as personal property upon satisfaction of all the requirements set forth in [NRS 361.2445](#) if the mobile home or manufactured home remains within the jurisdiction of the county assessor.

6. If a mobile home or manufactured home which has been converted to real property is completely destroyed and removed from real property, the county assessor shall remove the mobile home or manufactured home from the tax roll.

**NAC 361.1305 Billboards.** ([NRS 360.090](#), [360.250](#), [361.227](#))

1. The taxable value of a billboard is the cost of replacement of the billboard less depreciation and obsolescence.

2. The cost of replacement of a billboard must be computed by multiplying the cost of acquisition to the current owner by the appropriate factor located in the annual *Personal Property Manual*. The factor that corresponds to the year the billboard was acquired must be used. Additional depreciation and obsolescence may be calculated separately.

### **Determination of Taxable Value of Personal Property**

**NAC 361.1345 Definitions.** ([NRS 360.090](#), [360.250](#), [361.227](#)) As used in [NAC 361.1345](#) to [361.139](#), inclusive, unless the context otherwise requires, the words and terms defined in [NAC 361.1351](#), [361.1355](#) and [361.1361](#) have the meanings ascribed to them in those sections.

(Added to NAC by Tax Comm'n by R034-03, eff. 12-4-2003)

**NAC 361.1351 "Acquisition cost" and "original cost" defined.** ([NRS 360.090](#), [360.250](#), [361.227](#)) "Acquisition cost" or "original cost" means the actual cost of property to its present owner, including, without limitation, the costs of transportation and the costs of installation.

(Added to NAC by Tax Comm'n by R034-03, eff. 12-4-2003)

**NAC 361.1355 "Costs of installation" defined.** ([NRS 360.090](#), [360.250](#), [361.227](#)) "Costs of installation" means the costs of direct labor, direct overhead and the capitalized expense of interest or imputed charges for interest which are necessary to make the property operational.

(Added to NAC by Tax Comm'n by R034-03, eff. 12-4-2003)

**NAC 361.1361 "Personal Property Manual" defined.** ([NRS 360.090](#), [360.250](#), [361.227](#)) "*Personal Property Manual*" means a manual for the valuation of personal property that is published by the Department annually pursuant to [NAC 361.1365](#).

(Added to NAC by Tax Comm'n by R034-03, eff. 12-4-2003)

**NAC 361.1365 *Personal Property Manual: Publication; contents; approval; use.*** ([NRS 360.090](#), [360.250](#), [361.227](#))

1. The Department will annually publish a *Personal Property Manual* which describes the methods and standards that must be used for the valuation of personal property. The manual must include, without limitation, annually updated:

(a) Cost-index factors that must be used in the conversion of acquisition cost into an estimate of replacement cost new;

(b) Expected-life schedules that indicate the category of expected life for each type of property or type of industry in which the property is used; and

(c) Percent-good tables which indicate the rate of depreciation that must be applied.

2. The *Personal Property Manual* must be approved by the Commission before publication. The Department, at least 1 month before presenting the manual to the Commission for approval, must disclose all proposed modifications to the manual and hold a public workshop on the modifications.

3. Each county assessor shall use the *Personal Property Manual* in determining the taxable value of personal property.

(Added to NAC by Tax Comm'n by R034-03, eff. 12-4-2003)

**NAC 361.1371 Procedure for determination of taxable value.** ([NRS 360.090](#), [360.250](#), [361.227](#))

1. The taxable value of personal property must be determined by adjusting the acquisition cost of the property by a cost-index factor and reducing the adjusted acquisition cost by an estimate of applicable depreciation. The taxable value so determined shall be deemed to be the indicator of value of replacement cost new less depreciation.

2. In determining taxable value, a county assessor shall use the schedules in the *Personal Property Manual* that show the cost-index factors, the rates of depreciation and the percent good by year. The assessor shall use the schedules by:

(a) Selecting the appropriate expected useful life of the personal property; and

(b) Selecting the appropriate cost-index factor, based on the year of acquisition of the property, and applying it to the acquisition cost of the property.

↳ The result shall be deemed to be the replacement cost new of the property.

3. The assessor shall select the method of applying depreciation to the personal property by either:

- (a) Multiplying the adjusted acquisition cost of the property by the rate of depreciation and subtracting the result from the adjusted acquisition cost; or
  - (b) Multiplying the adjusted acquisition cost of the property by the percent-good factor.
- The result from either approach shall be deemed to be the taxable value of the property.  
(Added to NAC by Tax Comm'n by R034-03, eff. 12-4-2003)

**NAC 361.1375 Determination of expected life, cost-index factors and depreciation.** ([NRS 360.090](#), [360.250](#), [361.227](#))

1. Personal property must be categorized by the specific type of property that it is or by the type of industry in which it is used. Each category must be assigned to a schedule of expected life which is based on commonly available sources of information, including, without limitation, the life expectancy guidelines published by the Marshall and Swift Valuation Service and any other sources published in the *Personal Property Manual*.
2. The cost-index factors published in the *Personal Property Manual* must be determined by calculating the average change in costs over time. The Department shall identify the sources used to calculate the average change.
3. For purposes of calculating the amount of applicable depreciation, personal property must be assigned to one of the following expected lives:
  - (a) Three-year life;
  - (b) Five-year life;
  - (c) Seven-year life;
  - (d) Ten-year life;
  - (e) Fifteen-year life;
  - (f) Twenty-year life; or
  - (g) Thirty-year life.
4. Depreciation must be calculated over the expected life of the personal property by using the declining balance method, except that tables which provide a method other than the declining balance method for calculating depreciation may be used if the tables have been approved by the Commission and included in the *Personal Property Manual*.
5. For purposes of calculating the rate of depreciation, a residual amount of 5 percent must be used. Percent-good tables using a residual amount other than 5 percent may be adopted by the Commission if the Department has conducted a market study or has otherwise obtained information which indicates that a different residual amount is appropriate for the category in which the personal property is placed pursuant to subsection 1.

**NAC 361.138 Reported acquisition cost for leased equipment.** ([NRS 360.090](#), [360.250](#), [361.227](#)) For leased equipment, the reported acquisition cost is the cost which the user of the property would incur if the equipment were purchased, less any discount customarily allowed by a seller.  
(Added to NAC by Tax Comm'n, eff. 10-10-83; A by R034-03, 12-4-2003)

**NAC 361.139 Personal property acquired with real property for lump sum; use of other valuation techniques.** ([NRS 360.090](#), [360.250](#), [361.227](#))

1. In determining the taxable value of personal property which was acquired with real property for a lump sum, the assessor may refer to appropriate guides which list the cost of equipment to determine the value of the personal property in relation to the value of the real property. In addition, the assessor may estimate the age of the equipment by inspecting it or discussing the approximate value of the equipment with manufacturers, dealers or other persons in the business who have knowledge of the value of the equipment. The serial number, if it exists, may enable a manufacturer to determine the date of manufacture and the original cost.
2. If sufficient data is not otherwise available to establish acquisition cost, or if the assessor determines that a reported acquisition cost is not equal to the fair market value of the property at the time of acquisition plus any costs of transportation and costs of installation, the assessor may use any nationally recognized valuation technique to determine the acquisition cost, including, without limitation:
  - (a) Establishing the current cost of replacement of the property with new property by reference to current manufacturing costs. If the current cost of replacement is known, the assessor shall apply depreciation to that cost to determine the taxable value.

(b) Using a guide which lists the cost or a procedure recognized by businesses which use such equipment to determine the taxable value. Before such a guide or procedure may be used, an assessor must receive approval from the Executive Director.

(c) Using information based on current market data.

3. Upon request, the Division of Local Government Services of the Department will provide information on various guides which may be used to determine original cost.

(Added to NAC by Tax Comm'n, eff. 10-10-83; A 6-29-84; R034-03, 12-4-2003; R068-12, 9-14-2012)

**NAC 361.11745 "Trade fixture" defined.** ([NRS 360.090](#), [360.250](#)) "Trade fixture" means an item of personal property that:

1. Is installed or attached nonpermanently to real property by an owner or tenant for the purpose of conducting a business or trade and not for the enhancement of the real property to which it is installed or attached; and

2. Has a unique identity and function which is related to the business or trade for which it is installed or attached, and which is distinct from the real property to which it is installed or attached.

## Excerpts from Department of Taxation Letter of Guidance

### Letter dated December 2, 2004, responding to County Assessors' Question:

"In determining the proper amount of depreciation to be applied to personal property using the Department's Personal Property Manual, does the year of acquisition refer to a calendar year or a fiscal year?"

#### Short Answer:

The use of the year of acquisition is dependent on the fiscal year only with regard to the correct selection of the Personal Property Manual to be used. The year of acquisition is otherwise an actual date during a calendar year that indicates the age of the property to be used in the expected life tables.

(Please ask the department for a copy of the letter if you wish to read the entire discussion.)

### Methodology Used to Estimate Cost Indexes

The percent change in each index is measured between the current year and the prior year. The mean of the sum of the changes for each year of the expected life table is calculated and becomes the basis for the cost index to trend acquisition cost to a current replacement cost.

### Sources Used to Estimate Cost Indexes

#### Producer Price Index (PPI)

The Producer Price Index (PPI) is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPIs measure price change from the perspective of the seller. This contrasts with other measures, such as the Consumer Price Index (CPI), that measure price change from the purchaser's perspective. Sellers' and purchasers' prices may differ due to government subsidies, sales and excise taxes, and distribution costs.

#### Data Source

- The PPI sample includes over 16,000 establishments providing approximately 64,000 price quotations per month supplemented with data from other sources for some areas.
- Establishments are selected for the PPI survey via systematic sampling of a list of all firms in the industry.
- Participation by firms is completely voluntary.
- Participating establishments report price data online through a secure website.
- Good and services included in the PPI are weighted by value-of-shipments data contained in the 2017 economic censuses.
- Industries and products undergo systematic resampling as needed, to account for changing market conditions.

The Producer Price Index series reference has been updated from a Stage of Processing ID code to a Final Demand-Intermediate Demand Goods Index. The conversion may be found in an Index Concordance Table located at <http://www.bls.gov/ppi/fdidconcordance.htm>, which converts SOP3200, Capital equipment, to FD41312, Private capital equipment. The PPI Index using FD41312 may be found at <http://www.bls.gov/ppi/fdidsf16.htm>.

#### Consumer Price Indexes (CPI)

The consumer price index (CPI) is a measure of the average change over time in the prices paid by urban consumers or households for a market basket of consumer goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) the CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers households of wage earners and clerical workers that comprise approximately 29 percent of the total population and (2) the CPI for All Urban Consumers (CPI-U) and the

Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 93 percent of the total population and include in addition to wage earners and clerical worker households, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI represents all goods and services purchased for consumption by the reference population (CPI-U or CPI-W). BLS has classified all expenditure items into more than 200 categories, arranged into eight major groups. Major groups and examples of categories in each are as follows:

- FOOD and BEVERAGES (breakfast cereal, milk, coffee, chicken, wine, full-service meals and snacks)
- HOUSING (rent of primary residence, owners' equivalent rent, fuel oil, bedroom furniture)
- APPAREL (men's shirts and sweaters, women's dresses, jewelry)
- TRANSPORTATION (new vehicles, airlines fares, gasoline, motor vehicle insurance)
- MEDICAL CARE (prescription drugs and medical supplies, physicians' services, eyeglasses and eye care, hospital services)
- RECREATION (televisions, cable television, pets and pet products, sports equipment, admissions)
- EDUCATION AND COMMUNICATIONS (college tuition, postage, telephone services, computer software and accessories)
- OTHER GOODS AND SERVICES (tobacco and smoking products, haircuts and other personal services, funeral expenses)

Also included within these major groups are various government-charged user fees, such as water and sewerage charges, auto registration fees, and vehicle tolls. The CPI also includes taxes (such as sales and excise taxes) that are directly associated with the prices of specific goods and services. However, the CPI excludes taxes (such as income and Social Security taxes) not directly associated with the purchase of consumer goods and services.

The CPI does not include investment items, such as stocks, bonds, and life insurance. (These items relate to savings and not to day-to-day consumption expenses.)

The Consumer Price Index series ID reference is CUUR0400SA0, CUUS0400SA0 for area West Urban, All Items. The base period is 1982-84 = 100. The data may be found at [http://data.bls.gov/pdq/SurveyOutputServlet?data\\_tool=dropmap&series\\_id=CUUR0400SA0,CUUS0400SA0](http://data.bls.gov/pdq/SurveyOutputServlet?data_tool=dropmap&series_id=CUUR0400SA0,CUUS0400SA0).

### **Marshall Valuation Service**

Marshall Valuation Service publishes a national average equipment cost index based on industry type. The Department measures the change in the index for each category of industry from the prior year.

## Market Tests

In addition to the sources already cited, the Department conducts market tests to validate the results of applying the cost indices to particular items of personal property. The original cost of a selected sample of personal property items is trended using the proposed cost index conversion factor. The result of this calculation is compared to the actual average resale of the item obtained from various market research sources. The purpose of the market test is to ensure the proposed cost indices do not result in a value which exceeds full cash value. The market tests are also used to establish hypothetical market-based depreciation schedules. The sources of information for the market comparisons include the following:

- **N.A.D.A., The Manufactured Housing Cost Guide**, (Online Version) (J.D. Power) The Guide provides the average retail book value by manufacturer, model, and region of mobile home, with tables for options. Values are provided for homes one to fourteen years of age, and conversion tables for homes older than 14 years.
- **Aircraft Bluebook Price Digest Online**, (Online Version) (Price Digests, Informa Business Media, Inc., Overland Park, KS). The Bluebook provides representative average retail prices of fixed wing aircraft and helicopters.
- **Grounds Maintenance Equipment Blue Book Online**, (Online Version) (Price Digests, Informa Media, Overland Park, KS). The Blue Book provides the estimated average resale or retail price, excluding options of power equipment.
- **Powersport Vehicle Blue Book**, (Online Version) (Price Digests, Informa Business Media, Inc., Overland Park, KS). The Blue Book provides pricing in the powersports industry, including snowmobiles, personal watercraft, trailers, and motorcycles.
- **The Official Tractor Blue Book Online**, (Online Version) (Price Digests, Informa Business Media, Inc., Overland Park, KS). The Blue Book provides the estimated average resale or retail price, excluding options of power equipment.
- **Green Guide for Construction Equipment**, (Online Version) (Equipment Watch, 6151 Powers Ferry Road, Suite 200, Atlanta, GA 30339) The values in this guide are derived from a reporting system of equipment dealers, distributors, manufacturers, auctioneers and contractors. It is based on both surveys and averaging of actual sales. These volumes include Volume 1: Earthmoving Equipment, Volume 2: Lifting Equipment and Volume 3: Other Equipment (Compaction, Concrete and Crushers).
- **Orion Research Corporation**, (Roger Rohrs Publisher) (<http://www.usedprice.com>) The website is the electronic successor to the Orion Blue Book. It determines the used prices of computers and peripherals based on dealer surveys gathered nationwide. Dealers are asked to provide the “asking price,” “Selling price,” and “days to sell.” The used price is then calculated based on what an average store could sell the product for in 30 days or less. Orion Research states that this data is updated on an ongoing basis.

### Methodology Used to Estimate Expected Useful Life

The Department estimates the expected useful life of different types of personal property by surveying a variety of sources. Expected useful life is defined as the amount of time an item of personal property can be expected to last before it wears out, decays, gets used up, becomes obsolete, or loses its value from natural causes. The life is measured from the time the property is first put into service until it is retired from service or permanently withdrawn from use in a trade or business, or when the production of income ceases because the property has been sold, exchanged, converted to personal use, abandoned, or otherwise destroyed.

The Department does not have the resources available to perform its own mortality or actuarial studies. However, there are other sources that do perform this service. The sources itemized below include actuarial studies of the Internal Revenue Service, Marshall and Swift Costing Service, and the California State Board of Equalization. Also included are the surveys of several western states and certain industries.

### Sources Used to Estimate Expected Useful Life

**Marshall Swift Valuation Service, “Residential Cost Handbook”, (Marshall & Swift, L.P., December 2022)** Costs ranges are based on averages created for the US and Canada, and other items listed are based on what is readily available today.

**Marshall Swift Valuation Service, “Life Expectancy Guidelines,” (Marshall & Swift, L.P., January 2023)**

Depreciable assets are listed by industry group and are extracted from U.S. Treasury Department Internal Revenue Service Publication 534 titled “Depreciation.” The Guidelines list ranges of life. In certain cases, the IRS was not the primary source. In those cases, the range of life is based on a composite of studies of equipment, bookkeeping practices and appraisers’ opinions as compiled from a consensus of recognized trade groups, suppliers and other interested parties. Computers and terminals are one example of an independent study conducted by Marshall & Swift.

**Department of the Treasury, Internal Revenue Service, [Publication 946](#), “How to Depreciate Property,” and [Publication 534](#), “Depreciating Property Placed in Service Before 1987.”**

These two publications specifically identify types of property and the expected useful life. For instance, an example of five-year property is computers and peripheral equipment.

## 2025-26 PERSONAL PROPERTY MANUAL: VALUATION GUIDELINES

### Exemptions from Property Taxes

---

Article 10, Section 1 of the Nevada Constitution requires the "valuation for taxation of **all** property, real, personal and possessory...." NRS 361.045 also provides that, except as otherwise provided by law, all property of every kind and nature whatever within this state shall be subject to taxation. Other statutes, however, grant exemptions to particular types of property. Some are granted exemption at face-value, and other types of property must qualify according to specific criteria in order to receive the exemption.

The types of exemptions range from partial exemptions granted to veterans, disabled veterans, surviving spouses and blind persons to exemptions from taxation for all **real** and personal property granted to governmental entities, religious, charitable and non-profit organizations, and individual organizations which are specifically cited. In many cases, the statutes specifically recite that the property must be used to carry out the legitimate function of the organization, and if not, the property becomes taxable.

For the types of exemptions which must go through a qualification process, the county assessors must collect, evaluate and process the various claims for property tax exemptions. Application forms which have been approved by the Nevada Tax Commission should be made available. Each form should request information regarding taxpayer contact information, the type of exemption being claimed, the property which the exemption, if granted, would affect, a statement or statements why the property qualifies for the exemption, and supporting documentation if necessary. The purpose of any form is to provide sufficient information to help assessors make a reasoned determination to approve or deny applications.

In the event a claim for exemption is ambiguous or open to interpretation, how the property is used may indicate whether or not an exemption applies. The general rule espoused by the courts is that strict construction of exemption statutes applies to exemptions for property held in private ownership but not to exemptions for public property where exemption is the rule and taxation the exception. 2 Thomas M. Cooley, *The Law of Taxation*, § 673 at 1414-15 (4th ed. 1924). Said another way, property held in private ownership must strictly comply with all the criteria established for the exemption because "taxation is the rule and exemption the exception." On the other hand, for property held by a public entity, the rule is reversed to say "exemption is the rule and taxation the exception."

The purpose in establishing a broad construction of exemption for public entities is to prevent an escalating spiral of unnecessary taxation and administrative costs with no benefit to the public. 16 Eugene McQuillin, *The Law of Municipal Corporations*, § 44.57 at 206 (3rd ed. 1994). If one governmental entity chooses to tax the property of another governmental entity, the governmental entity forced to pay taxes may have to levy and collect new taxes to meet the demands of the tax. 2 Cooley, *supra*, § 621 at 1313. The effect of such a tax spiral is that the public would be taxing itself to raise money to pay itself.

In cases where it is not clear whether an exemption should be granted, assessors should solicit legal advice from the county district attorney's (D.A.) office.

The attached chart lists the current status of specific exemptions available in the statutes, in alphabetical order.

## 2025-26 PERSONAL PROPERTY MANUAL: VALUATION GUIDELINES

### Determining Whether Fixtures are Real or Personal Property

NRS 361.333 requires that each major class of property be examined to determine whether there is equality of assessment. One of the principal classes of property is personal property, pursuant to NRS 361.227(4). Uniformity and equality of assessment thus depend on proper classification. Although NRS 361.035 defines real estate and NRS 361.030 defines personal property, in practice it is sometimes difficult to tell whether an item is personal property or a fixture that is part of the real estate. As the Attorney General stated in Opinion #41 (1963), “the classification depends on the facts of each particular case.” The assessor is encouraged to consult the Division of Local Government Services and/or the District Attorney in difficult cases.

A fixture may be defined as an item that was originally personal property which has been installed or attached to land or an improvement in a permanent manner. There is an abundant amount of case law which discusses three tests often used in deciding whether an item is a fixture. The tests are:

1. Physical Annexation;
2. Constructive Annexation, also called Adaptation; and
3. Intent

Under the first test, annexation, an item is a fixture if it is attached to, imbedded in or permanently resting upon land or an improvement, or is attached by other means that are normally used for permanent installation, and cannot be removed without substantially damaging the item or the land or improvement with which it is being used. For example, an item which is attached to real property for stability and has quick disconnect attachments such as simple wiring and conduit connections may not meet the test for a permanent fixture.

Under the second test, constructive annexation, an item is a fixture if the use or purpose of an item that is not otherwise physically annexed to land or an improvement is so adapted that it is:

- A. A necessary, integral or working part of the land or improvement;
- B. Designed or committed for use with the land or improvement; or
- C. So essential to the land or improvement that the land or improvement cannot perform its desired function without the nonattached item.

Using the constructive annexation test, if the purpose of the item is to augment the use of the improvement no matter how it is attached, such as an elevator, the item must be considered a fixture. Another example would be heating, ventilation, and air conditioning equipment (HVAC). Equipment used to heat, ventilate, or cool a structure is considered to be real property.

Permanently attached personal property may be temporarily removed for repair or renovation onsite and still be considered permanently attached. Permanently attached fixtures do not include movable tangible personal property that is attached for convenience, stability or an obviously temporary purpose.

Underlying both the physical or constructive annexation tests is a determination of intent. An assessor must consider whether the item is intended to be a permanent part of the land or improvement, taking into account physical or constructive annexation, and other objective manifestations of permanence. NAC 361.1127 provides examples of objective manifestations of permanence.

A trade fixture may be distinguished from a fixture. It is an item of personal property that is non-permanently attached to real property for the purpose of conducting a business or trade; and has a unique identity and function separate from the real property to which it is attached. NAC 361.11745 provides a definition of trade fixture.

Pursuant to NRS 361.244, a mobile or manufactured home becomes real property when the Assessor has listed it on the tax roll as real property. The classification of mobile and manufactured homes as real property may be made when the requirements enumerated in NRS 361.244(1) and (2) are met. This includes the issuance of a Real Property Notice by the Manufactured Housing Division of the Department of Business and Industry. Factory-built housing becomes real property once it is permanently affixed to the land. These housing units conform to the Uniform Building Code and are not titled. As such they are not personal property nor are they considered “conversions”. These “UBC” homes do not exhibit the HUD placards found on manufactured housing. Instead, they may have a placard referencing NRS 461.080 and their serial numbers may begin with the characters “UBC”.

In general, personal property is defined by exception pursuant to NRS 361.030. Property that does not meet the criteria of real property is personal property. The Assessor should recognize that certain fixtures such as bars, stages, walk-in coolers, or bank drive-ups, may already be included in the real property component of the Assessor’s Taxable Value. The Assessor should review the differing building occupancies of the Marshall-Swift cost manuals to ensure that a component of real or personal property is not double-assessed. The improper classification of any component of taxable property as real or personal does not render the valuation void or invalid.
