RE: General Public Comment – R081-26

Distinguished Members of the Nevada Tax Commission:

On behalf of the Nevada Taxpayers Association, I wanted to take a moment to circle back around on Regulation 081-26 that was previously adopted by this body on August 19. As you may recall, NTA had some outstanding concerns with the proposed language and the Commission adopted the regulation with the instructions for the Department to continue to work with NTA on the questions and concerns raised during the meeting. I wanted to recognize that we did meet with the Department and although all of our concerns were not addressed we did come to collaborative agreement on some of the suggested edits. This regulation was placed on the September 24th Legislative Commission agenda and NTA provided public comment on our remaining two concerns but recognized the Department's interaction and response to NTA stating that the language we had concerns with the Department's intent was to broaden requirements for taxpayers and not restrict them. Our public comment included that we would take the Department at their word and monitor the results and if we find that there is difficulty or harm caused to taxpayers then we will pursue regulatory or statutory changes in the future.

Again, we thank the Department and this Commission for the interactive process and wanted to provide that update on the record.

Sincerely,

Becky Dutro

Becky Dutro, President
